All day
comfort
in a
harness
you can
trust.

U.S. Patent 6,668,434
Others Pending

The ExoFit XP is the most comfortable and user-friendly harness ever designed for commercial use!

- The industry's first "truly washable" harness with removable padding.
- State-of-the-art 3-D mesh wicks moisture keeping you cool and delivering all-day comfort.
- Unique spring loaded "stand-up" dorsal D-ring ensures fast, easy and safe connections.
- Superior "X" design padding wraps around the wearer for the ultimate in no-tangle donning.
- Color coded quick-connect buckles make it easy to put on and fit the harness every time.

Ultimate Comfort The ExoFit XP incorporates new material technology to deliver the ultimate in comfort. Its state-of-the-art 3-D mesh lining allows moisture to evaporate and cool air to circulate throughout the shoulder, back, hip and leg pads. This padding is removable and completely washable - another industry first. The cushioned leg and hip straps offer comfort and additional security during a fall. The "soft" edging prevents chafing and the lightweight webbing is strong without feeling stiff and coarse.

Ease-of-Use The ExoFit XP's superior "X" design wraps around the wearer for the ultimate in no-tangle donning and comfortable security. The spring loaded "stand-up" dorsal D-ring ensures an easy connection to a lanyard or SRL without straining to reach it. The harness incorporates a 5-point adjustment system and an adjustable dorsal D-ring for a perfect fit every time. Our industry-first quick-connect buckles are now color coded (silver leg buckles and black chest buckle) making donning as easy as 1-2-3. The "easy-grip" end tabs provide something to hold onto when adjusting the straps.

Total Safety Another industry-first is the built-in impact indicator on the dorsal D-ring. Integral lanyard keepers serve two functions; provides a connection point for your lanyard when not in use, and for added safety it will snap-free upon "snagging" eliminating trip-fall hazards. Web strap keepers also prevent dangerous entanglements. A properly positioned pelvic strap distributes forces during a fall.

1110303 Tower Climbing

ExoFit XP Harness Models:

- 1110103: Back D-ring, loops for belt, quick-connect buckles, size X-large
1110100=small, 1110101=medium, 1110102=large
