## 3M™ DBI-SALA® Safe Buckets

With an integrated closure system that helps prevent dropped objects, our Safe Buckets are designed to be the perfect companion for workers at height carrying heavy loads.

### Closure systems

Every Safe Bucket features either a drawstring or a locking hook and loop closure system that acts as an extra layer of spill-protection during transport and lifting. Colorful indicator tabs provide quick visual cues to indicate whether the bucket is in lockdown mode or easy-access mode.

### Built-in connection points

The Safe Bucket was engineered for use with tools at height, and includes six connection points for tethering.

### High-quality canvas and vinyl

Safe Buckets are available in both heavy-duty canvas and vinyl variants that are load rated for 100 lbs. and 250 lbs. respectively.

## Integrated carabiner and hoisting strap

Instead of rope, which is susceptible to fraying, a heavy-duty hoisting/shoulder strap is built into every Safe Bucket. Each bucket is equipped with a high-quality and lightweight aluminum twist-lock carabiner load rated for 30 kN (6,700 lbs.). There is no need to worry about a knot failing, or a non-locking carabiner which may slip off at a connection point.

## Puncture resistance

Where you work, durability is non-negotiable. That's why every Safe Bucket features hard composite plating at the bottom to protect it from accidental punctures. A leather sleeve also covers the inserts, protecting them from the elements and harsh work environments.
