

UNIRAIL™ HORIZONTAL SYSTEM

SAFETY AT ITS BEST

FUNCTIONAL • FLEXIBLE • ADAPTABLE

THE ULTIMATE IN FALL PROTECTION

PRODUCT FLYER

UNIRAIL™ HORIZONTAL LIFELINE SYSTEM

EXTRUDED ALUMINUM RAIL SYSTEM

- Free-flowing attachment carriage and bracket-free design offer hands-free functionality while navigating corners and building contours
- Can be fitted to a wide range of structures, supporting multiple workers for both fall arrest and fall restraint applications
- Can span up to 10 feet (3 meters)
- 6000 series aluminum alloy and 316 stainless steel components help system withstand harsh environments, providing longevity and saving future maintenance and replacement costs
- Product design and fixing centers reduce structural loading and increase adaptability to building or structural tolerances, especially in weaker structures
- The main rail floats in its fixings to mitigate the effects of thermal expansion and contraction which would otherwise cause the rail to buckle

Compliant with EN795, OSHA and AS/NZS standards

PROVEN TRACK RECORD

With use in buildings and commercial marine applications, UniRail™ provides the confidence and satisfaction workers need to do their best work safely.
