

GUARDIAN^{HALO}

FALL PROTECTION

2018 PRODUCT CATALOG

LETTER FROM THE PRESIDENT

We are pleased to present the Guardian Fall Protection 2018 full-line catalog. In the years since our previous full-line catalog there have been many changes at Guardian Fall Protection, and I am pleased to be one of them. It has been just over two years since coming on board at Guardian and what a couple of years it has been! With the addition of new products and expanding our sales force throughout the United States and Canada, there has never been a more exciting time to be part of the fall protection industry. Our new catalog reflects this new era, and reaffirms our dedication to providing the finest fall protection products on the market.

We like to think of this catalog as not just a product catalog, but as an informational resource to be used time and time again to help solve the daily challenges of working at height. Nearly every page contains valuable information regarding application and best-use practices that will help you determine which fall protection solution fits a specific situation.

Most importantly, on behalf of the entire Guardian team, I want to thank you for your business and for being part of the Guardian family. We look forward to serving you for all your fall protection needs. Should you have questions about any of the products or services in the catalog, please do not hesitate to contact us.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Phil Williams', with a large, stylized loop at the end.

Phil Williams
President

FULL-BODY HARNESSSES

FULL-BODY HARNESSSES

Guardian's harness part numbers vary based on product brand, sizing, and buckle configuration. Reference the infographics below to determine your ideal harness size and buckle preference.

HARNESS SIZING CHART

This sizing chart is for general reference only and may not reflect every individual's measurements. Please call us today and we can provide a safety harness that fits your needs.

BUCKLE STYLES

PASS-THROUGH (PT)

Connect by passing the male plate through the female plate to create a secure connection.

TONGUE BUCKLE (TB)

Adjust by pulling a strap through the buckle and locking it in place by connecting the tongue through a grommet on the strap.

QUICK-CONNECT (QC)

Connect by clicking the male end into the female end, and disconnect by pushing the release buttons on each side of the buckle.

- Finished webbing ends
- Impact indicator
- Dorsal D-ring padding

The **Velocity Harness** is our entry level harness, and also, one of our most popular harness models. It is designed to present a clean professional look on the job.

The most unique feature of this harness is its webbing wear indicator, which allows you to easily recognize damage.

VELOCITY HARNESS

SURFACETECH WEBBING

Guardian is always working hard to find new ways of increasing the resistance of our harnesses to contamination, while simultaneously improving their durability and functionality. This is why we are very proud to offer **Surfacetech** technology in many of our webbing-based products.

Surfacetech webbing has microscopic peaks and valleys, which function to greatly reduce the surface area that comes in contact with contaminants. **Surfacetech** webbing is especially easy to clean, and is highly resistant to dirt, mold, and other contaminants.

The integrated roller buckles hold straps firmly in place, while still allowing for easy adjustment.

Stretch points throughout the harness promote superior flexibility and movement.

Side positioning D-rings on construction harnesses are backed with a wear pad and heavy-duty fabric to increase durability.

CONSTRUCTION TUX HARNESS

The **Construction Tux Harness** is equipped with side D-rings that make it ideal for Work Positioning applications. A long-standing product offering, the *Construction Tux* is designed with a harness sewn into an external vest, which reduces the possibility of tangling or contamination of harness webbing.

- No-tangle body wear system for easy donning
- Leg straps zip into the back of the harness for storage
- Dorsal D-ring
- Reflective strips provide enhanced visibility
- Impact indicator

The **Kevlar Harness** is ideal for work in high-heat environments. It is made with highly durable kevlar webbing and dielectric D-Rings and buckles.

The **Universal Cross-Over Harness** is designed with a front D-ring for Rescue and Work Positioning applications. Its unique design ensures the straps stay on the shoulders during work.

TRAUMA STRAP

WHAT HAPPENS AFTER I FALL?

Part # 10733

SUSPENSION TRAUMA

Suspension Trauma is a potentially life-threatening condition caused by prolonged suspension in a full-body harness after a fall.

Symptoms include:

- Poor blood circulation
- Heart palpitations
- Low blood/oxygen levels
- Dizziness/fainting

FEATURES:

- Helps reduce the effects of suspension trauma
- Lightweight and easy to install
- An important part of any rescue plan
- Low profile

The **Trauma Strap** is an indispensable item for anyone working at heights, and helps to mitigate the effects of suspension trauma (which can occur in as little as 15 minutes) in the event of a fall. By allowing the fallen worker to assume a standing position and relieve pressure on the lower extremities, the Trauma Strap allows better blood flow and reduces fatigue. Compatible with all Guardian full-body harnesses, the Trauma Strap is easy to adjust, and its low profile keeps it out of the way during work.

SELF-RETRACTING LIFELINES

SELF-RETRACTING LIFELINES

Guardian has numerous self-retracting lifelines (SRLs), perfectly suited for a wide variety of fall protection applications. Reference the infographics below to determine your ideal SRL. If you have any questions about SRLs, visit www.guardianfall.com or call 1.800.466.6385.

SRL CLASSES

	CLASS A	CLASS B	LEADING EDGE
AVERAGE ARREST FORCE	1,350 LBS.	900 LBS.	N/A
MAX POTENTIAL DECELERATION	24"	54"	54" - 102"
SRL EXAMPLE			
CLASS A: DIABLO 11080			
CLASS B: VELOCITY 42002			
LEADING EDGE: HALO 10925			

ANSI Z359.14-14 establishes three different classes for SRLs. These classes differentiate SRLs based on average arrest force, maximum potential deceleration, and use in LE applications.

HOOK TYPES

STEEL SNAP HOOK

ALUMINUM SNAP HOOK

SWIVEL STEEL HOOK

ALUMINUM REBAR HOOK

STEEL REBAR HOOK

TIE-BACK HOOK

ALUMINUM CARIBINER

UNDERSTANDING LEADING EDGE (LE)

LEADING EDGE
APPROVED

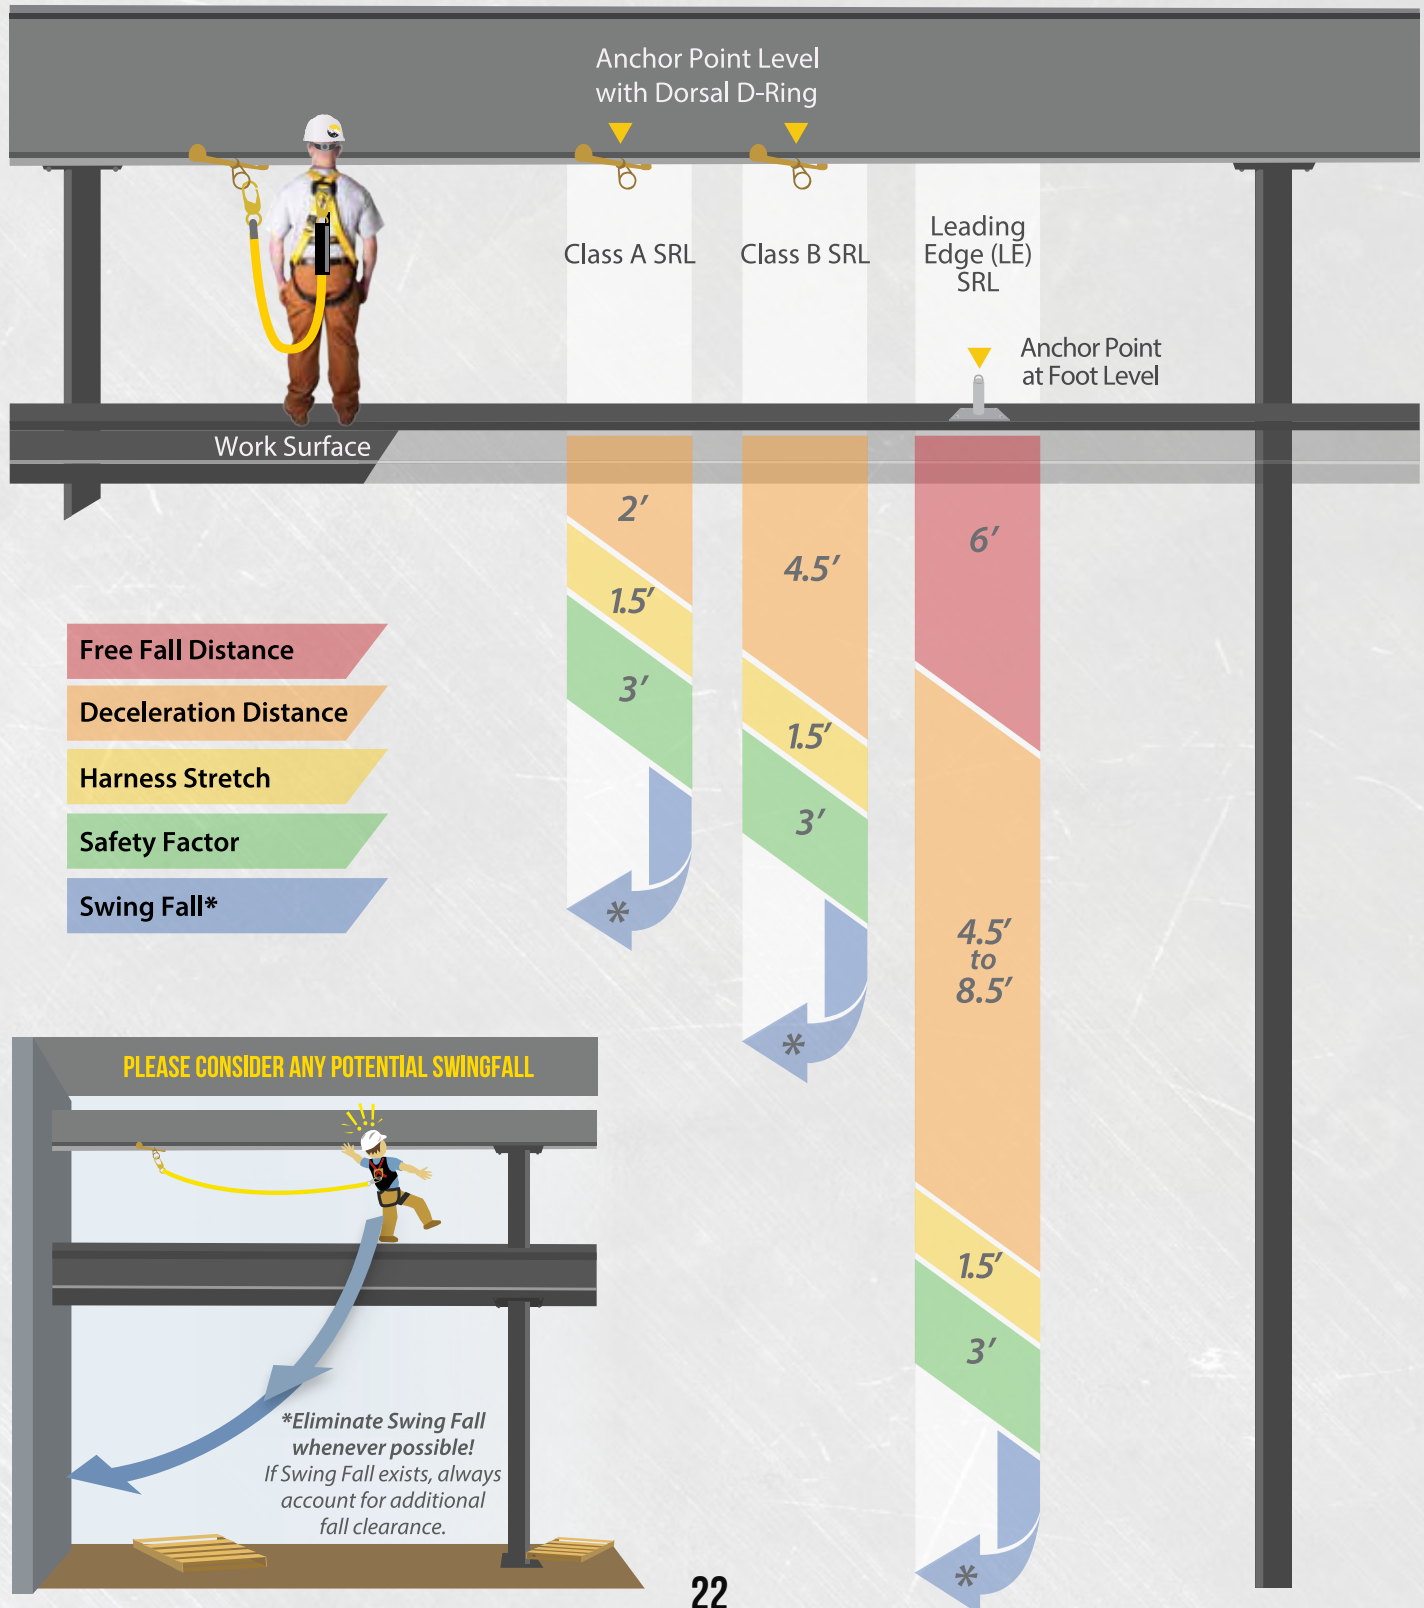

NOT
LEADING EDGE
APPROVED

Guardian LE SRLs must have a cable lifeline, utilize a shock absorbing device, and be permitted for use in LE work. While the ideal position for any attachment point is overhead, LE retractables play an important role because, frequently, the only viable attachment point is at foot level.

UNDERSTANDING SRL FALL CLEARANCE

Fall clearance calculation shown based on standing worker falling directly in-line with anchor point. Always consider potential swing fall and other hazards when calculating fall clearance.

DIABLO 2.0

**NEW & IMPROVED
WITH THE SAME
PORTABLE &
LIGHTWEIGHT
DESIGN YOU LOVE.**

ORIGINAL DESIGN

DIABLO SRL 2.0

The 6' **Diablo SRL** is compact and lightweight, and its ergonomic housing is shaped to fit right in the palm of your hand. But don't be fooled by the *Diablo's* small size; it is a powerhouse in safety, rated to support workers weighing from 130-420lbs., and designed with a quick-action braking system that will stop a fall in an instant.

Lock Indicator

The *Diablo* can be used on its own, or teamed up with a second *Diablo* using our triple-locking **Dual SRL Bracket** to make a *Double Diablo*, which allows for 100% tie-off.

DUAL SRL BRACKET

11058

The Dual SRL *Bracket* includes a visual indicator to help assure you that it is fully locked and ready for use, and makes assembling a dual leg SRL quick and simple.

ASTM F887 **ARC
FLASH**

SELF-RETRACTING
LIFELINES

The **Diablo Arc Flash SRL** is designed for workers exposed to the risk of arc-flash (also known as flash-over) or other high-energy applications. An arc flash can occur through incidental contact with an energized source, creating a temporary electrical short that can result in extreme conditions of heat, light/fire, and noise. The Diablo Arc Flash SRL ensures workers remain safely tied-off during these catastrophic events. The web is fully compliant with all ASTM F887 testing procedures and offers the maximum safety as required by the NFPA, as well as applicable ANSI testing standards.

The **Diablo Cable Big Block SRL** is available in both 50' and 65' lengths. Rated for use in LE applications, the **Diablo Cable Big Block** is built with lightweight and heavy-duty housing.

- Easy to carry
- High-strength composite cable guide
- Non-corrosive components
- Quick-action braking system
- Reinforced nylon housing

HALO SRLS

**DURABLE,
RELIABLE,
& BUILT TO LAST.**

The premier SRL option in the marketplace, Halo Series SRLs can do it all. Whether for LE use, standard use, Fall Arrest, or Fall Restraint, there is a durable and high-performing Halo SRL waiting for you.

HALO SRL

Halo SRLs are manufactured with highly durable Technora webbing or cable and non-corrosive, lightweight components. *Halo SRLs* stand up to the harshest working conditions.

LANYARDS

LANYARD OPTIONS

Internal Shock

Shock absorbing functionality incorporated into entire length of lanyard.

External Shock

Shock absorbing functionality incorporated into integral external shock pack.

Non-Shock

No shock absorbing functionality.

Adjustable

Adjust to fit length required by job.

Tie Back

For tying around compatible structural anchor.

Cable

Ideal for high heat and harsh environments.

Work Positioning

Used in work positioning applications.

Extension

Offers a variety of benefits. See page 45 for more!

INTERNAL SHOCK ABSORBING LANYARDS

The **Internal Shock Absorbing Lanyard** is comprised of heavy-duty outer polyester webbing with a polyester core specifically designed to reduce the impact forces resulting from a fall. Because the shock absorption is built directly into the lanyard there is no need for an external shock absorber, making the *Internal Shock Absorbing Lanyard* a particularly lightweight option.

INTERNAL SHOCK ABSORBING LANYARD

The **4-in-1 Lanyard** is designed for use in a wide variety of applications. This versatile lanyard can be used as an extended free fall lanyard, a harness extension lanyard, a tie-back lanyard, or a dual leg 100% tie-off lanyard.

STRETCH LANYARDS

Stretch Lanyards are ideal for working in tight spaces or around machinery where long lanyards can create a hazard. The *Stretch Lanyard's* ability to contract its length from 6' to 4½' helps reduce the risk of interference with tools or other objects.

ANCHOR POINTS

ANCHOR POINTS

Guardian has an anchor point option for nearly any job. Whether working with wood, steel, concrete, and more, Guardian has an anchor that will meet your jobsites needs.

ANCHOR INSTALLATION

Guardian carries a wide variety of anchor points (over 100 in fact!). Each anchor point is designed for various substrates. Be sure to reference your instructions prior to selecting an anchor to ensure it's the right anchor for the job.

**METAL
SUBSTRATE**

**CONCRETE
SUBSTRATE**

ANCHOR POINTS

REMEMBER! WHEN CONNECTING TO AN ANCHOR POINT

Never connect more than one hook
to the anchor attachment point at one time!

BEAMER[®] 2000+

ANCHOR

The choice of industry professionals for many years, the Beamer 2000+ now features a swivel D-ring and improved adjustability. Easily sliding along beams, the Beamer 2000+ works with you, not against you.

GUARDIAN[®]
FALL PROTECTION

BEAMER®

Beamer 2000
Part # 00101

The **Beamer 2000** is a versatile Fall Arrest anchor designed for use either overhead or at foot level. Suitable for installation on beams, the **Beamer 2000** trails behind the user during work, and is quick and easy to install and adjust.

BEAMER 2000

Guardian offers a wide variety of **Concrete Anchor Straps**. Concrete Anchor Straps install to rebar or other compatible structural anchors, and are then cast in place. When strap is no longer needed, simply cut away and discard.

ACE ANCHOR

MADE WITH GALVANIZED STEEL.
REQUIRES 3,000 PSI CONCRETE.

15040

The **ACE Anchor** is a cast-in-place anchor designed for installation during the concrete pouring stage of construction.

CB SERIES ANCHORS

Pioneered by Guardian Fall Protection, **CB Anchors** are perhaps the most proven fall protection anchors on the market. Intended for permanent installations, *CB Anchors* are designed for installation onto wood, metal, and concrete substrates (fasteners are included for wood and metal applications). *CB Anchors* are composed of durable, galvanized steel, and are an excellent choice for nearly any fall protection application, including for use in combination with a compatible horizontal lifeline system.

DROP THROUGH ANCHOR

MADE WITH STAINLESS STEEL.

1/4" THICK STEEL PLATE, 8 1/2" CABLE WITH SWIVEL D-RING.

- Easy to install
- Lightweight & durable
- Custom lengths available

4" STEEL PLATE FOR HOLES UP TO 2" DIAMETER

00516

6" STEEL PLATE FOR HOLES UP TO 3" DIAMETER

00517

12" STEEL PLATE FOR HOLES UP TO 6" DIAMETER

00518

We all know that certain jobsites can be difficult when it comes to the installation of anchorage connectors. Overhead anchors can be especially troublesome but with the Drop-Through Anchor customers now have another option. To install, either pre-drill a compatibly sized hole into the floor or walking surface (or simply find an existing hole), pass the anchor cable through the hole, and then move down to the level below, and attach to the anchor. When the job is complete, the anchor can easily be picked up and moved to the next job.

GROUND-UP

ANCHOR SYSTEM

(SAFELY INSTALLED
FROM THE GROUND)

GROUND-UP ANCHOR

1 - RECEIVER
2 - GROUND-UP ANCHOR
3 - REMOTE GRAB SYSTEM
4 - EXTENSION POLE

The **Ground-Up Anchor System** allows for the installation of an anchor from the safety of the ground. The worker avoids exposure to a dangerous fall during installation.

The *Ground-Up Anchor System* consists of a cast-in-place anchor receiver (for either wood or metal framing), a removable anchorage connector, the remote grip system, and an extension pole. The grip system attaches to the extension pole, which then enables both placement and retrieval of the anchor point.

STANDING SEAM ANCHORS

STANDING SEAM ROOF CLAMP

MADE WITH POWDER-COATED & GALVANIZED STEEL.
FOR USE WITH SRLs.

00250

- 360° rotation
- Adjustable from 24" to 36"
- Compatible with Guardian SRLs up to 50'
- Use with Adapter (Part # 10975) for SRLs from 50' - 65' in length

PERMANENT ADJUSTABLE STANDING SEAM ROOF ANCHOR

MADE WITH LIGHTWEIGHT ALUMINUM & STAINLESS
STEEL. PERMANENT OR REUSABLE ANCHORAGE.

53221

- Tie-off ring swivels 360°
- Adjusts to fit roof seams from 12"-24"
- Utilizes S5-Clamps
- Compatible with Absorbator HLL

2-WAY UNIVERSAL STANDING SEAM ROOF CLAMP

MADE WITH GALVANIZED STEEL.

10600

- Unique reversible installation accommodates various seam sizes
- Quick and easy to install

SCREW-DOWN ANCHORS

SCREW-DOWN METAL ROOF ANCHOR

MADE WITH POWDER-COATED STEEL.
INSTALLS ON WOOD OR METAL SUBSTRATES.

00255

- Rotates 360°
- Compatible with Guardian SRLs up to 50'
- Use with *Adapter* (Part # 10975) for SRLs from 50' - 65' in length

4-WAY PLATE ANCHOR

MADE WITH POWDER-COATED STEEL.

00691

- For installation onto wood, metal (as thin as 24 gauge), and concrete substrates
- Can be installed on flat roofs, pitched roofs, or vertically onto wall
- Supports one worker in Fall Arrest, or two workers in Fall Restraint
- Offers a connection point for work in any direction
- Ideal for use in HLL systems

SKY HOOK

GUARDIAN
FALL PROTECTION

Guardian's passion for innovation began way back in 1993 with our very first product, the Skyhook Anchor. The inventor was tasked by an inspector to install a tie-off point for his fall protection equipment, to which he replied, "What am I supposed to connect to, the sky?" Clearly that wasn't an option, so he came up with the next best thing! Designed to fit a wide variety of roof pitches, the Skyhook easily installs at the roof peak to provide a safe and convenient fall protection anchor point.

ANGEL ANCHOR SYSTEM

MADE WITH ZINC PLATED STEEL
NON-PENETRATING ANCHOR

00260

SRL (PART # 10925) AND SWIVEL TOP (PART # 00380) SOLD SEPERATELY

The **Angel Anchor System** is the ideal solution for a versatile single tie-off point when penetrating the substrate is not an option. Its specially designed 3-piece "spine" makes it easier to transport and assemble, and allows for the anchor to be used on surfaces up to a 5° slope. This anchor is corrosion resistant and supremely durable.

ECOANCHOR

MADE WITH FIRE-RESISTANT NEOPRENE.
NON-PENETRATING ANCHOR

30801

The EcoAnchor is a water filled counterweight anchor system. The EcoAnchor has been tested and approved on a wide variety of low slope roofs. The EcoAnchor weighs less than 17 lbs. when empty, 948 lbs. when filled with water and requires no penetrations into the substrate.

HYDRAJAWS ANCHOR TESTER

2000C DELUXE HYDRAJAWS ANCHOR TESTING KIT.

15031

The **Hydrajaws System** tests fasteners and anchors. It consists of a mechanical screw arrangement acting through a hydraulic load cell, which measures the load applied to the fixture directly. The resulting load value is then indicated on the dial-type or optional digital gauge.

The tester has a built-in movement indicator scale (50mm standard or 100mm optional) to show "first movement" on the fixing prior to the test load being applied. The tester is supplied as an integral part of the tester kit.

HYDRAJAWS ADAPTER WORKS IN COMBINATION WITH 15031

15004

An accessory for the *2000C Deluxe Hydrajaws* testing kit, the *Guardian Fall Protection Hydrajaws Adapter* is designed to make load testing possible over gaps in the substrate. It may also be used to perform testing of the *CB-12 Anchor*.

THE FALL PROTECTION HIERARCHY

The Fall Protection Hierarchy should be considered when designing fall protection solutions for both existing and new facilities.

- 1 ELIMINATE**
- 2 FALL PREVENTION**
- 3 FALL RESTRAINT**
- 4 FALL ARREST**

1. Eliminate- Eliminate the hazard by creating a physical barrier, keeping workers from the fall hazard.

2. Fall Prevention- Isolating or separating the hazard or hazardous work practice from employees or others.

3. Fall Restraint- Securing the worker to an anchorage using a lanyard or lifeline short enough so that it will prevent the person's center of gravity from reaching the fall hazard.

4. Fall Arrest- A system designed to stop a worker after a fall has begun.

ALLIGATOR SYSTEM

The **Alligator Parapet Roof System** is the ultimate multi-functional and durable guardrail system. It is composed of heavy-duty steel, making it extremely resistant to corrosion and damage, and can be adjusted to fit any parapet wall from 2" - 16". This system features adjustable height rails to help ensure compliance with the 42" (+/- 3") top rail height required by OSHA, allowing it to be used on a variety of parapet heights. It can also be installed onto pitched and barrel roofs, on a side-wall, corner mounted, and mounted flush to a roof.

The Alligator Guardrail Posts are compatible with both 2" X 4" boards and Snap-On Metal Rails (Part #61074).

PARAPET SYSTEMS

The **Parapet Clamp Guardrail System** is fast and easy to install. Each Parapet Clamp includes a corresponding guardrail post, which is compatible with both 2" X 4" boards or our *Snap-On Metal Rails*. This system can fit any parapet from 10" – 24" in thickness, and an entire system can be easily assembled by one person.

PARAPET CLAMP GUARDRAIL SYSTEM

MADE WITH POWDER-COATED STEEL.

15170

- Fits wide range of parapets (minimum 7" high)
- OSHA-compliant guardrail system
- Durable, non-corrosive components
- 8' max spacing
- Easy to install

The **Parapet Anchor System** can be used to accommodate guardrail posts, as a standalone anchor point, or in conjunction with a horizontal lifeline (when installed perpendicular to the parapet only). This anchor system can adjust to fit parapet walls 4" - 20". It also has large, easy-to-grip adjustment handles for quick set-up.

Please note that this system is not intended for simultaneous Fall Prevention and Fall Arrest use.

PARAPET ANCHOR FOR GUARDRAILS

MADE WITH GALVANIZED STEEL.

15171

- Adjusts to fit parapet walls between 4" - 20" wide
- Can be used as anchor point for Fall Arrest
- OSHA-compliant guardrail system
- Easy to install

C-SLAB & RESIDENTIAL SYSTEMS

C-SLAB GRABBER

MADE WITH POWDER-COATED STEEL.

15500

- Compatible with wide range of concrete slabs
- OSHA-compliant guardrail system
- Easy to install

The **C-Slab Grabber** is the perfect solution for installing guardrail systems on concrete slabs. It includes an anti-slip grip, a quick-adjust handle, and a back-up safety pin (to prevent accidental detachment). The **C-Slab Grabber** is fast and easy to install, and adjusts to fit concrete slabs up to 36" thick. It is compatible with 2" X 4" and 2" X 6" boards, as well as cable or *Snap-On Metal Rails* (Part # 61074).

RESIDENTIAL GUARDRAIL SYSTEM

MADE OF POWDER-COATED STEEL.
FITS MULTIPLE ROOF PITCHES.

RESIDENTIAL GUARDRAIL SYSTEM

GUARDRAIL RECEIVERS

GUARDRAIL RECEIVERS

MADE OF POWDER-COATED STEEL. REUSABLE RECIEVER.

GUARDRAIL POST RECEIVER

15158

2" X 4" RECEIVER

61029

Guardrail Receivers may be installed on wood, metal, and concrete substrates, and are composed of powder-coated steel for superior durability and weather resistance.

Part # 15158

Part # 61029

Part # 61140

Part # 61141

GUARDRAIL STAIR MOUNTS

MADE OF POWDER-COATED STEEL. REUSABLE STAIR MOUNTS.

GUARDRAIL POST STAIR MOUNT

61140

2" X 4" STAIR MOUNT

61141

Stair Mounts are the ideal solution for the installation of guardrails on unfinished stair cases. Composed of powder-coated steel, *Stair Mounts* are suitable for installation onto both wood and concrete substrates.

GUARDRAIL RECEIVERS

GUARDRAIL ANGEL BOOT

MADE OF HIGH STRENGTH PLASTIC.
REUSABLE BOOT WITH TOEBOARD SLOT.

15188

Part # 15188

The **Guardrail Angel Boot** is used in the assembly of a wooden guardrail system. Use two 2" X 4" boards to assemble the vertical member, and additional 2" X 4" boards for railings.

GUARDRAIL GUSSET

MADE OF GALVANIZED STEEL. REUSABLE GUARDRAIL GUSSET.

5 3/4" GUSSET

15159

9 1/4" GUSSET

61027

Guardrail Gussets are simple to install with either screws or nails, and allow for guardrail systems to be installed flush with outside walls. Compatible with all Guardian *Universal Guardrail Posts*.

FRICTION FIT BRACKET

MADE OF ZINC-PLATED STEEL.
COMPATIBLE WITH UNIVERSAL GUARDRAIL POSTS.

15026

The **Friction Fit Bracket** is specially designed to adjust and securely fit onto fascia boards. This bracket is supremely durable, and may be used in combination with all Guardian *Universal Guardrail Posts*.

HORIZONTAL LIFELINES

HORIZONTAL LIFELINES

Horizontal lifelines (HLLs) provide an anchor point that can span long distances, and allow for multiple workers to attach simultaneously. Made from either cable or rope, HLLs are a great option for nearly any type of construction work.

UNDERSTANDING SPANS

LIFELINE MATERIALS

CABLE

Ideal for permanent installation applications, cable lifelines are extremely resistant to damage.

POLYESTER

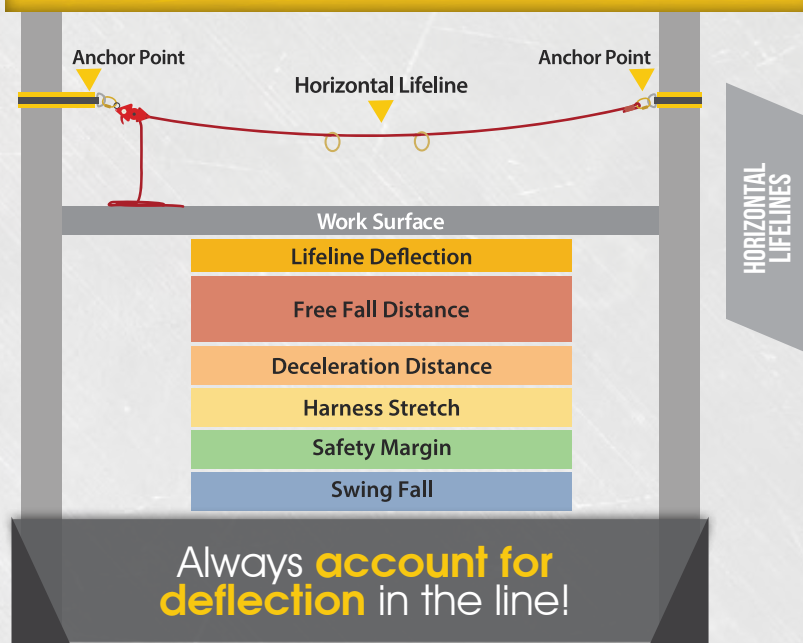

Polyester lifelines are manufactured with integral shock absorbing functionality and superior strength.

KERNMANTLE

The most durable and flexible rope offered by Guardian, with a dual-layer design to resist damage.

REMEMBER! WHEN CALCULATING FALL CLEARANCE

BEAMGUARD™ & BRIDGE GUARD™

Suitable for loading in any direction, the **Beamguard System**, can be installed onto structural beams of a variety of sizes. Requiring no special equipment, the Beamguard can be installed and adjusted with basic hand tools.

BEAMGUARD SYSTEM

MADE OF POWDER-COATED STEEL. HORIZONTAL LIFELINE POST OR ANCHOR.

BEAMGUARD STANDARD

THICKNESS, UP TO 1.25"; WIDTH 4" - 13.75"

04700

BEAMGUARD INTERMEDIATE

THICKNESS, UP TO 2.125"; WIDTH 4" - 19.75"

04701

BEAMGUARD LARGE

THICKNESS, UP TO 3.375"; WIDTH 4" - 31.75"

04702

- Offset post facilitates easy movement along beam
- Suitable for upright or inverted installation
- Can be used as an individual anchor point when not used with an HLL

BEAMGUARD PASS-THROUGH TOP

MADE OF POWDER-COATED STEEL.
BOLTS ON TO BEAMGUARD POSTS.

04710

The **Beamguard Pass-Through Top** attachment allows for continuous connection even when transitioning between lifeline spans.

*Beamguard
Pass-Through Top
Part # 04710*

BRIDGE GUARD 2-WAY TOPPER

00352

BRIDGE GUARD™ 4-WAY TOPPER

00358

The **Bridge Guard** is designed for use in bridge-building, precast concrete, and leading edge structural concrete applications, and allows for quick and easy on-site installation of horizontal lifeline systems.

BRIDGE GUARD SYSTEM

MADE OF ALUMINUM. PERMANENT HORIZONTAL LIFELINE SYSTEM.

75" POST WITH 2-WAY TOPPER

BIG BOSS HORIZONTAL LIFELINE

BIG BOSS HORIZONTAL LIFELINE

Make it simple for
4 workers to easily
move around
the jobsite.

Includes: 82' polyester horizontal lifeline, Rope Tensioner, 4 O-Rings, & SOS Bag

BIG BOSS HLL

BIG BOSS HLL KIT

MADE OF POWDER-COATED STEEL & POLYESTER.
82' HORIZONTAL LIFELINE, FOR UP TO FOUR USERS.

30800

The **Big Boss HLL Kit** is a temporary, reusable lifeline system that can be used by up to four workers in Fall Arrest applications. It spans a maximum of 82', and includes a rope bag for easy transportation and storage.

BIG BOSS HITCHCLIP® HLL KIT

MADE OF POWDER-COATED STEEL & POLYESTER.
82' HORIZONTAL LIFELINE, FOR UP TO TWO USERS.

30812

This **Big Boss HitchClip HLL Kit** is quick and easy to install, and allows a maximum two workers to work in Fall Arrest applications. The *HitchClip* anchorage connectors can also act as individual tie-off points when not used in combination with the HLL, making this Big Boss HLL Kit not only supremely functional, but versatile as well.

BIG BOSS ECOANCHOR HLL KIT

MADE OF POWDER-COATED STEEL & POLYESTER.
82' HORIZONTAL LIFELINE, FOR UP TO TWO USERS.

04634

The **Big Boss EcoAnchor HLL Kit** consists of (2) *EcoAnchors* and (1) *Big Boss HLL System*. The *EcoAnchor* is an industry-leading counterweight anchorage connector that requires no penetration of the substrate. Weighing only 17 lbs. when empty, it fills completely with water within 8 to 10 minutes and then is ready for use. For use by a maximum of two workers in Fall Restraint applications only.

Big Boss EcoAnchor Kit

Includes 2 EcoAnchors & 1 Big Boss HLL System
(Fall Restraint Only)

Part # 04634

POLYESTER & KERNMANTLE HLL

Polyester and Kernmantle HLLs are simple to install temporary systems that span between fixed anchorage points, and provide a safe horizontal anchorage for multiple users to move freely around a work space. These devices are simple to install, easily assembled by one person, and can support a maximum of two workers in Fall Arrest applications.

Part # 01400

A full-page photograph of a construction worker in silhouette on a corrugated metal roof. The worker is wearing a safety harness and is connected to a thick, white vertical lifeline that runs down the side of the building. The background is a clear, grey sky. A large, bright yellow banner is overlaid across the middle of the image, containing the title text.

VERTICAL LIFELINES

VERTICAL LIFELINES

Ideal for work in climbing, residential construction, and more, vertical lifelines offer incredible versatility and functionality. Use in combination with either trailing rope/cable grabs or positioning devices.

LIFELINE MATERIALS

CABLE

Ideal for permanent installation applications, cable lifelines are extremely resistant to damage.

POLYDAC

Polydac Rope is highly resistant to rot or mildew, and offers resistance to most alkalis and solvents.

POLYSTEEL

Resistant to nearly all water absorption, and will not swell or weaken when wet.

REMEMBER! WHEN CALCULATING FALL CLEARANCE

Always consider swing fall when not working in line with your anchor.

ROPE GRAB VS. POSITIONING DEVICE

Rope Grabs move easily along rope, giving workers two free hands. Locks automatically during falls.

VS

Rope Positioning Devices move along rope when squeezed and pulled into position by the worker. Locks automatically during falls.

POLYSTEEL & POLYDAC ROPE

The 5/8" diameter **PolySteel Rope** is ideal for high-moisture environments because it limits water absorption and is highly resistant to ultraviolet light.

The **Rope Anchor** helps in the installation of a vertical lifeline around a structural anchor. Rated to withstand loads up to 5,000 lbs.

VERTICAL
LIFELINES

CABLE LADDER SYSTEM

The **Cable Ladder System** is intended for permanent installations, and is ideal for locations where workers need to climb to and from a raised location on a regular basis. The Cable Ladder System is available in 100', 200', and 300' lengths, and is extremely durable and weather resistant. Workers simply need to attach their compatible cable grab to the cable running down the center of the ladder, and they are fully protected from falls as they climb.

Cable Ladder System & Cyclone Tower Harness

SAFETY KITS

ABCs OF FALL PROTECTION

If the risk of falling exists, you require the following:

ANCHOR POINT

The Equipment your connector attaches to.
Check the worker weight capacity of the anchor!

BODY WEAR

A full-body harness with dorsal (back) D-ring.
It is essential to take the time to fit the harness properly!

CONNECTOR

Lanyard, self-retracting lifeline (SRL), or vertical lifeline (VLL).
Consider the total available fall clearance when selecting the connecting device!

FALL SAFETY EASY AS **A B C**

Our kits are designed to get you more of the components needed to assemble a complete fall safety system.

A construction worker wearing a yellow hard hat, safety glasses, a light-colored t-shirt, and khaki pants is standing on a roof. He is wearing a yellow safety harness and is holding a yellow rope that is anchored to the roof. A yellow bucket is visible in the foreground. The background shows a dense forest.

Bucket -of- Safe-Tie

Harness • Anchor • Lifeline

The simple, all-in-one solution for anyone working on a roof, the Bucket of Safe-Tie is a complete personal fall protection system. A harness, lifeline, and anchor all in a convenient carrying bucket! What could be better?

Complete Fall Protection System

SAFETY KITS

Built for the roofer, by the roofer, the **Bucket of Safe-Tie** includes everything you need for a complete fall protection system all in one place. It includes a vertical lifeline, full-body harness (size S – L), anchor point(s), and Storage Bucket.

LADDER SAFETY

LADDER SAFETY

Falls from ladders represent a large percentage of the injuries resulting from falls every year. Through the simple use of ladder safety equipment, climbing ladders can easily be made significantly safer.

LADDER
SAFETY

DID YOU KNOW?

Ladders were in the **top 10** for most cited **OSHA violations** this last year!

REMEMBER!
OSHA 1926.1053(B)(1)

"When portable ladders are used for access to an upper landing surface, the ladder side rails shall extend at least 3 feet (.9 m) above the upper landing surface to which the ladder is used to gain access."

THE ULTIMATE IN LADDER SAFETY

SAFE-T LADDER EXTENSION SYSTEM

ADJUSTABLE KNOBS

SAFETY LATCH

HAND GRIPS

The **Safe-T Ladder Extension System** attaches to the top of a ladder to provide a safe and easy transition from the ladder to a raised surface. It requires no tools, drilling, or bolting to install, and is one of the most effective means of improving the safety of nearly any extension ladder. Once installed, it provides two offsetting handrails that offer a point of walk-through to step on or off the ladder. This patented piece of equipment assists workers in complying with OSHA standard 1926.1053(b), which requires ladder rails to extend a minimum of 3' above the working surface.

SAFE-T LADDER EXTENSION SYSTEM

EASY TO INSTALL POWDER-COATED ALUMINUM LADDER EXTENSION. COMPATIBLE LADDER RAIL DIMENSIONS: WIDTH: 1 3/4" MAX DEPTH: 3 3/4" MAX.

SINGLE LADDER EXTENSION

10800

6-PACK LADDER EXTENSION

10804

**Safe-T™ Ladder
Extension & Gate**

Part # 10800 & 10798

SAFE-T SELF-CLOSING GATE

MADE OF POWDER-COATED STEEL.
LIGHTWEIGHT & DURABLE LADDER GATE.

10798

The **Safe-T Self-Closing Gate**, designed for use in combination with the *Safe-T Ladder Extension*, is perfect for providing additional protection when climbing off or onto a ladder. It includes a self-closing mechanism, is both lightweight and durable, and is compliant with all applicable OSHA regulations.

Stop crawling off your ladder.
Safely walk through your ladder.

SAFE-T LADDER EXTENSION

GUARDIAN
FALL PROTECTION

Attaches to the top of nearly any ladder without the use of tools, and provides a safe transition point from ladder to roof. Helps meet OSHA regulation for ladder rails to extend 36" above the roof edge.

LADDER STABILITY TOOLS

LADDER STABILITY ANCHOR

MADE OF ALUMINUM.
INCLUDES (2) 4' VELCRO STRAPS FOR EASY INSTALL.

10808

The **Ladder Stability Anchor** functions to clamp to fascia board and then secure to the top rung of a ladder with two 4' long Velcro straps ensuring that the ladder will not fall or move.

LADDER ASSIST

MADE OF GALVANIZED STEEL.
SPRING-LOADED LADDER HAND SUPPORT.

15104

The **Ladder Assist** is used to provide additional support for workers who are transitioning from a fixed ladder to a raised working surface. It easily attaches to the top rungs of nearly any fixed ladder, and features a spring-loaded design for easy, one-handed operation. Please note that the **Ladder Assist** is not a Fall Arrest anchor.

NETTING

KARDIAN
PROTECTION

NETTING

NETTING OPTIONS

Residential netting is a great option if insufficient clearance exists for traditional fall protection.

Debris netting protects materials and equipment from falling off of your work surface.

NETTING MATERIALS

RESIDENTIAL NETTING

Fall Arrest rated Residential Netting is a perfect solution when the use of traditional Fall protection is infeasible.

DEBRIS NETTING

Vertical debris netting guards against debris or tools from falling over an unprotected edge.

PRO-KNIT NETTING

Designed with an even smaller mesh size for more protection against small materials falling over the edge.

DID YOU KNOW?

DEBRIS NETTING = GUARDRAIL

If installed accordingly, **Debris Netting** can double as your jobsites Fall Prevention!

DEBRIS NETTING

Our **Debris Netting** is designed and manufactured with a specialized double-strand configuration, as well as ultraviolet protective coating, which makes for a supremely durable and long-lasting product. Custom sizes also available.

DEBRIS NETTING

MADE WITH ULTRAVIOLET PROTECTIVE COATING.

	4' X 150' ORANGE NETTING	70001

MOBI SKYLIGHT PROTECTION SYSTEM

MADE OF POLYESTER & GALVANIZED STEEL. REUSABLE PROTECTION.

6' 7" X 6' 7" NETTING

70024

9' 10" X 9' 10" NETTING

70025

The **MOBI Skylight Protection System** is designed to prevent falls through skylights to lower levels. Once installed, it can also be used as an anchor point (per OSHA 1926) for Fall Arrest or Fall Restraint by attaching a compatible lanyard or SRL to the MOBI ratchet strap.

CONFINED SPACE & RESCUE

CONFINED SPACE & RESCUE

A key component of fall protection is ensuring the prompt rescue of a fallen worker. Sometimes this rescue needs to take place in a difficult to access area, making confined space and rescue equipment an important component of any job.

COMMON CONFINED SPACE APPLICATIONS

- *Manholes*
- *Crawl spaces*
- *Tanks*
- *Pits*
- *Sewer systems*
- *Boilers*
- *Silos*
- *Chillers*

Many jobs require workers to access narrow or confined spaces. Guardian has all the necessary equipment to keep you safe from falls when performing these tasks.

REMEMBER! OSHA REQUIRES A FALL PROTECTION PLAN

Your fall protection plan must account for the 'prompt' rescue of a fallen worker. Workers can suffer from negative effects of suspension trauma intolerance in as little as 15 minutes.

WHAT IS SUSPENSION TRAUMA?

Symptoms include: faintness, nausea, breathlessness, dizziness, sweating, paleness, unusually low or high heart rate, hot flashes, unusually low blood pressure, loss of vision.

ARC-O-POD

The **Arc-O-Pod** is a high quality Rescue and Retrieval system. It is a 90" tall aluminum tripod that is lightweight, portable, and easily set up by just one worker. Its legs can be adjusted in 2" increments to best fit your work area. The Arc-O-Pod can fit a maximum 5½' diameter hole, and is specially designed to eliminate risk of slippage or movement. It also includes a storage bag for easy transportation between jobsites.

RAPID DEPLOYMENT RESCUE LADDER

The **Rapid Deployment Rescue Ladder** is specially designed to facilitate the rescue of fallen workers at significant heights, and is thus particularly applicable to the wind energy industry. This durable ladder system is manufactured with unique rung standoffs to make footholds easier and self-rescue more likely. It is also capable of supporting up to two workers at once (maximum 310 lbs. each, including all equipment), thereby allowing a rescuer to climb down to assist a fallen worker. The *Rapid Deployment Rescue Ladder* can be deployed within seconds, and is one of the most stable and functional rescue ladders available.

RAPID DEPLOYMENT RESCUE LADDER KIT

KIT INCLUDES: RESCUE LADDER, 3' CROSS ARM STRAPS, POMPIER HOOKS, & STORAGE BAG. MAXIMUM CAPACITY: 310 LBS.

RESCUE LADDER	10819
RESCUE LADDER WITH BELAY SYSTEM	10829

CONFINED SPACE & RESCUE

The **Rescue Ladder Kit** facilitates prompt rescue of a fallen worker. Easily installed and deployed in only a few moments, this 18' self-rescue ladder is dropped down to the conscious victim. A highly visible, convenient, and weather resistant carrying bag is integrated to the ladder to allow it to be located close to the fall hazard regardless of conditions, thereby making response time faster. Fall protection plans require more than simply contacting emergency services and waiting for help to arrive. The *Rescue Ladder Kit* is an ideal option for ensuring workers are recovered as quickly as possible. Please note that this kit only supports one worker at a time.

GOTCHA RESCUE KITS

As is the case with all rescues, a prompt recovery of the fallen worker is essential. **Gotcha Rescue Kits** work effectively with either conscious or unconscious victims, allow a single rescuer to carry out the rescue from a point of safety, and provide the option of either lowering the fallen worker to the next lowest level, or raising them back up to the nearest point of safety. To perform a rescue, the rescuer must have specific rescue training; consider the series of training classes offered by F.I.R.S.T. Choice Training, a division of Guardian Fall Protection, if additional training is needed.

SUITABLE FOR EVACUATION AND RESCUE. RATED FOR 495 LBS.

GOTCHA CRD KIT (195' ROPE)

53032

GOTCHA CRD KIT (325' ROPE)

53033

The **Gotcha CRD Rescue Kit** is a constant rate descent device suitable for both rescue and evacuation. It allows for a rescuer to raise or lower the fall victim to the nearest point of safety, or for a single user to descend to safety at a rate controlled by the equipment. No assembly is required by the user.

Rescuers must have specific rescue training; consider training classes offered by **F.I.R.S.T.**

Fire & Rescue Kit**
Part # 15021

GOTCHA RESCUE KIT ACCESSORIES

GOTCHA SUSPENSION LOOP

OPTIONAL ADD-ON TO THE GOTCHA RESCUE KIT

53038

The **Gotcha Suspension Loop** is an accessory for any rescue system that can help alleviate the effects of prolonged fall suspension. A supremely compact and lightweight device, the *Gotcha Suspension Loop* allows a fallen worker to stand up in their harness to relieve pressure from their limbs. The *Gotcha Suspension Loop* can make the difference between walking away from a fall and being carried away from a fall. It is important to note that this equipment will not be usable by an unconscious victim, and should only be considered as an intermediate measure for use until the victim is rescued.

THE GRABBA

OPTIONAL ADD-ON TO THE GOTCHA RESCUE KIT

53031

The Grabba is an optional add-on to the Gotcha Kit. It enables the rescue of persons suspended from retractable Fall Arrest devices while using rope or wire. The Gotcha Kit should be attached to the Grabba. The Grabba is then mounted on the rope or wire that the victim is suspended from. The Gotcha Kit is then extended so the Grabba slides down the rope or wire to the victim. When it reaches the victim the device locks onto the dorsal D-ring. When pulled upwards the Grabba grabs the wire or rope and a normal Gotcha Kit rescue can now be performed, raising or lowering the casualty to a point of safety.

JOBSITE EQUIPMENT

WILLIAM

JOBSITE EQUIPMENT

While the majority of *Guardian's* products are designed to keep you safe from falling, Guardian's Qualcraft and Trojan Tools product lines offer a variety of tools and equipment designed to make your life easier and get the job done faster.

ALL PRO

The **ALL PRO Pole** is the industry-standard aluminum scaffolding pole that can be customized to create a scaffold system up to 48' in height. *ALL PRO* poles are safe, strong, and durable, and their quick set up and tear down makes them ideal for the residential contractor.

- 0.140" thick aluminum walls with rib reinforcement
- Metal reinforced rubber surface eliminates distortion
- Spring-loaded pins combine with pole connector to add height up to 48'

JOB SITE
EQUIPMENT

ULTRA-JACK & ALL PRO

From pump jacks to poles, workbench systems to anchors and braces, the superior functionality and design of the **ULTRA-Jack** provides professionals with an easy to operate, easy to transport, durable, safe, and reliable aluminum scaffolding system.

ULTRA-JACK

WORKS WITH ALL PRO POLES

2000

- Spring-loaded cam lock for smooth operation and durability
- Toe straps accommodate large work boots
- Padded hand crank and brake lever for added comfort
- Highest climbing rate per stroke

ALL PRO BRACE

USED TO SECURE POLES TO THE WORK WALL, AND PROVIDES THE RIGID, TRIANGULAR BRACING AS REQUIRED BY OSHA TO ENSURE A SAFE JOBSITE.

2002

ALL PRO WORK BENCH

IS USED TO TRANSPORT TOOLS AND SUPPLIES UP THE SCAFFOLDING SYSTEM WITH EASE.

JOB SITE
EQUIPMENT

PUMP JACK

FOOT OPERATED SCAFFOLDING JACK.
EASILY RAISE AND LOWER SCAFFOLDING PLATFORM.

2200

The **Pump Jack** is designed for use with fabricated wood poles constructed of spliced 2" X 4" boards (up to 30' high) and accommodates two 2" X 10" wood planks with toeboards attached. Foot action does all the work needed to raise to position, and a hand crank is used to lower back to the ground once work is complete. The positive double-lock system brake ensures safety by securing itself to wood poles.

PUMP JACK BRACE

SECURES WOOD POLES TO BUILDING PROVIDING
STABILITY FOR PUMP JACK SCAFFOLDING SYSTEM.

2201

The **Pump Jack Brace** is designed to secure fabricated wood poles to buildings by providing the rigid steel triangular bracing as required by OSHA.

WORK BENCH / GUARDRAIL HOLDER

MADE OF ALUMINUM.

2204

The **Workbench / Guardrail Holder** is designed for wood staging, and is used in combination with the Pump Jack System. This allows tools and materials to travel alongside the work platform with ease.

SAWHORSES & WORK TABLES

The best sawhorse available on the market! Easy to assemble by just one person, the **Trojan Sawhorse** makes any job easier.

- Gripping teeth design requires no screws or nails
- Make a sawhorse any length you want by using any 2"X lumber

TROJAN SAWHORSE

POWDER-COATED, DURABLE STEEL,
FOLDING SAWHORSE LEGS.

STANDARD SAWHORSE -27" TALL

TS27

TALL SAWHORSE -35" TALL

TS35

ROLLER STAND, DOLLY CARTIN' & DOOR HOLDER

ROLLER STAND

DURABLE, POWDER-COATED STEEL, ADJUSTS FROM 24" - 40" IN HEIGHT.

STANDARD - 1" TUBE & 12" ROLLER

RS12

HEAVY-DUTY - 1¼" TUBE & 15" ROLLER

RS15

Roller Stand

Part #RS15

The Roller Stand is a perfect "extra hand" to have around when you need to support longer materials beyond your saw or table. With a durable, powder-coated finish, our Roller Stands will not rust or stain wood.

DOLLY CARTIN'

ALLOWS EASY TRANSPORTATION OF MDF, SHEETROCK, DOORS, WINDOWS, COUNTER-TOPS, AND MUCH MORE.

DC9

The **Dolly Cartin'** offers quick and easy transportation for doors or other large, awkward to carry paneling. Simply position material between the *Dolly Cartin'* clamp plates, secure, and move to the desired location.

DOLLY CARTIN'-MADE IN USA

ALLOWS EASY TRANSPORTATION OF MDF, SHEETROCK, DOORS, WINDOWS, COUNTER-TOPS, AND MUCH MORE.

DC9-US

- Two, 10" pneumatic wheels for smooth rolling
- Powder-coated finish
- Quickly adjust from 0" - 9" wide
- Turn-on-a-dime maneuverability

The **Door Holder** is a simple, stable, and easy to use clamp that facilitates the installation of doors or other materials. An extra pair of hands that will never let you down!

DOOR HOLDER

DURABLE POWDER-COATED STEEL TUBE.
QUICK SET UP, COMPACT SIZE FOR EASY STORAGE.

DH1

- Holds door panels up to 3" thick
- Great for routing and sanding
- 24" wide base, 10" vertical support

QUICK SUPPORT TOOL

The **Quick Support Tool** provides extra support when working alone, and is designed to support drywall, ceiling panels, fixtures, etc. for proper positioning during installation. This tool supports up to 110 lbs., and is adjustable from 3¾' - 10'. The quick support tool can also act as a cargo load stabilizer or used to construct a dust barrier.

QUICK SUPPORT TOOL-12'

SUPPORTS: 88 LBS. LOAD
LENGTH: 53"-144"

QS40

QUICK SUPPORT TOOL-10'

SUPPORTS: 110 LBS. LOAD
LENGTH: 45"-120"

QS50

QUICK SUPPORT CARRYING BAG

SPECIFICALLY DESIGNED FOR TRANSPORTING SUPPORTS AND ACCESSORIES. HOLDS UP TO 8 SUPPORTS.

QS65

WALL JACK, PEE VEE, & MAGNETIC SWEEPER

The **Wall Jack** is used to raise walls, as well as tighten flooring and decking. Made of heavy-duty cast iron, the *Wall Jack* rides up and down on a 2"x4" board, working just like a car jack. To lift walls, insert a length of $\frac{3}{4}$ " pipe (not included) to act as a lever. The *Wall Jack* has a capacity of 1,000 lbs. with the use of a 2"x4" board.

WALL JACK

MADE OF CAST IRON. 1000 LBS. CAPACITY PER JACK. WORKS WITH 2" X 4" POLE & 1" OD STEEL PIPE.

2601

WIND HOOK ACCESSORY KIT

INCLUDES BASEPLATE AND WIND HOOK CABLE. COMPLETES WALL LIFTING SYSTEM. USE WITH 2601.

2602

LITTLE PEE VEE

HELPS EASILY MOVE SILL PLATE ON CONSTRUCTION WALLS AND ASSURE PROPER ALIGNMENT.

2605

BIG PEE VEE

HELPS EASILY MOVE SILL PLATE ON CONSTRUCTION WALLS AND ASSURE PROPER ALIGNMENT.

2610

ADJUSTABLE WALL BRACE

MADE OF POWDER-COATED STEEL. ADJUSTS FROM 10½" TO 11½" WITH FAST THREAD DESIGN. HELPS EASILY BRACE AND ALIGN WALLS.

2620

MAGNETIC SWEEPER

SWEEPER PICKS UP FERROUS METAL SUCH AS TOOLS, BOLTS, AND NAILS. ONE PULL QUICK DEBRIS RELEASE. HANDLE EXTENDS FROM 30" - 44½"

2688

Part # 2688

ADJUSTABLE ROOF BRACKETS

The **Adjustable Roof Bracket** attaches to the *Pump Jack* system to offer a sturdy, flat surface to stand on while roofing or working at heights. The *Adjustable Roof Bracket* is designed to be used with 2" X 6" or 2" X 10" planks, and allows for easy installation and removal without damaging shingles.

ADJUSTABLE ROOF BRACKET

MADE OF 12-GAUGE STEEL. 10" ADJUSTABLE PLATFORM.
THREE POSITION PLATFORM: 30°, 45°, OR 60°.

2500

The **PRO-LINE Adjustable Steel Roof Bracket** offers a sturdy, flat surface to stand on while roofing or working at heights. The 10" platform adjusts to four different angles, and its rounded corners eliminate shingle damage.

PRO-LINE ADJUSTABLE ROOF BRACKET

MADE OF 11-GAUGE STEEL. 10" ADJUSTABLE PLATFORM.
FOUR POSITION PLATFORM: 30°, 45°, 60°, OR 90°.

3500

The **Adjustable Wood/Steel Roof Bracket** is made of heavy-duty wood and 15 gauge galvanized steel. It is designed to hold a 12" platform, is adjustable to two positions, and can be easily installed and removed without damaging shingles.

ADJUSTABLE WOOD / STEEL BRACKET

MADE OF 15-GAUGE STEEL. 12" ADJUSTABLE PLATFORM.
TWO POSITION PLATFORM: 45° OR 60°.

2510

The **Slater Style Roof Bracket** features six position locking adjustments, and is constructed of heavy-duty galvanized steel.

SLATER STYLE ROOF BRACKET

MADE OF HEAVY-DUTY STEEL. 10" ADJUSTABLE PLATFORM.
THREE POSITION TONGUE. 6 POSITION LOCKING ADJUSTMENT.

2525

NAILING PLATE
FOR USE WITH SLATER STYLE BRACKET PART # 2525

2526

FIXED ROOF BRACKETS

The **Fixed Roof Bracket** is durable, easy-to-install and remove, and is designed to protect all roof surfaces. Maximum 8' of spacing between brackets.

THE FUTURE IS NOW!

Be at the forefront of construction technology with RFID.

If you've ever felt like pen and paper documentation is time consuming and error-prone, Guardian's **G-Track Radio Frequency Identifier (RFID)** is for you.

G-Track RFID technology makes inspections, regular maintenance, and inventory a breeze. And, upon your request, Guardian supplies G-Track RFID Tags free of charge as an accessory for all of our products.

G-Track RFID Tags are available in adhesive, screw-on, or split ring models that readily attach to any Guardian product.

Our G-Track RFID Tags are compatible with Havoc SUPERTRACK CT equipment and safety management software.

For more information on Havoc and SUPERTRACK CT, visit:

www.havocllc.com/rfid/software/

RFID SYSTEM TAGS (RADIO FREQUENCY IDENTIFICATION)

RIGID PVC RFID TAG

1" DIAMETER BY .070"
MOUNTS ON METAL WITH ADHESIVE.

25 TAGS **72003**

100 TAGS **72004**

ABS RFID TAG

1.2" DIAMETER BY .175"
CENTER MOUNT HOLE FOR #8 SCREW.

25 TAGS **72005**

100 TAGS **72006**

ABS RFID TAG

2" DIAMETER BY .325"
CENTER MOUNT HOLE FOR #8 SCREW.

25 TAGS **72007**

100 TAGS **72008**

Part #72011

Part #72005

Part #72009

ABS RFID HANG TAG

1" DIAMETER SPLIT RING.
1.3" X 1.6" X .16"

25 TAGS **72009**

100 TAGS **72010**

FLEXIBLE RFID STICKER

1" DIAMETER
MOUNTS ON METAL WITH ADHESIVE.

25 TAGS **72011**

100 TAGS **72012**

SOLVING YOUR PROBLEMS WITH **CUSTOM SOLUTIONS**

ESG is a division of Guardian Fall Protection that specializes in providing customized solutions and project engineering for clients through the design and implementation of complete fall protection and facade maintenance systems.

WHAT WE DO

- Design & Engineering 
- System Install 
- Testing & Certification 
- Fall Hazard Analysis 

WHO
is your **Competent**

ONLINE COMPETENT PERSON TRAINING

≡ NOW AVAILABLE ≡

ONLINE COMPETENT PERSON TRAINING

**Competent
Person**

This online fall protection course from Guardian Fall Protection will help prepare you to take on the role of the jobsite Competent Person. In this eight-hour course, everything ranging from product knowledge, inspection, planning, and more are addressed through the use of presentations, videos, and knowledge checks.

ABOUT GUARDIAN

WARRANTY

Guardian Fall Protection (henceforth referred to as GFP) expressly warrants to the purchaser that all GFP products are free from defect in material and workmanship at the time of shipment. This warranty only covers defects in material and workmanship (those resulting from product design and/or manufacture); it does not cover conditions resulting from normal wear and tear, neglect, abuse, or accident. GFP's obligation under this warranty applies for the lifetime of the product, and is limited to the replacement of product only. This warranty is not transferable to any other GFP service, and does not apply to product that is resold after having been put into service. No other person or firm is authorized to assume or assign for GFP any other liability in connection with the sale or use of GFP products. Furthermore, this warranty is void if any product is changed or altered in any way, or if the product is used in a manner other than for which it is intended. All returns to GFP must have a return authorization that is obtained from the GFP Customer Service department. All returns must be shipped prepaid. *Contact the Customer Service Department at 1-800-466-6385.*

THE GUARDIAN PROMISE

At Guardian, our number one priority is keeping you safe. We promise that, if you fall using our equipment, we will replace the equipment involved in the fall free of charge.

Should you experience a fall, immediately remove the effected product(s) from service and contact our customer support team at 1-800-466-6385. They will help you coordinate return of the damage product and the shipment of your replacement.
