We are pleased to present the Guardian Fall Protection 2018 full-line catalog. In the years since our previous full-line catalog there have been many changes at Guardian Fall Protection, and I am pleased to be one of them. It has been just over two years since coming on board at Guardian and what a couple of years it has been! With the addition of new products and expanding our sales force throughout the United States and Canada, there has never been a more exciting time to be part of the fall protection industry. Our new catalog reflects this new era, and reaffirms our dedication to providing the finest fall protection products on the market.

We like to think of this catalog as not just a product catalog, but as an informational resource to be used time and time again to help solve the daily challenges of working at height. Nearly every page contains valuable information regarding application and best-use practices that will help you determine which fall protection solution fits a specific situation.

Most importantly, on behalf of the entire Guardian team, I want to thank you for your business and for being part of the Guardian family. We look forward to serving you for all your fall protection needs. Should you have questions about any of the products or services in the catalog, please do not hesitate to contact us.

Sincerely,

Phil Williams
President

FULL-BODY HARNESSES
Guardian’s harness part numbers vary based on product brand, sizing, and buckle configuration. Reference the infographics below to determine your ideal harness size and buckle preference.

**Harness Sizing Chart**

This sizing chart is for general reference only and may not reflect every individual’s measurements. Please call us today and we can provide a safety harness that fits your needs.

**Buckle Styles**

- **Pass-Through (PT)**
  Connect by passing the male plate through the female plate to create a secure connection.

- **Tongue Buckle (TB)**
  Adjust by pulling a strap through the buckle and locking it in place by connecting the tongue through a grommet on the strap.

- **Quick-Connect (QC)**
  Connect by clicking the male end into the female end, and disconnect by pushing the release buttons on each side of the buckle.

**D-Ring Locations**

- **Shoulder D-rings**
- **Sternal D-ring**
- **Side/Hip D-rings**

The Velocity Harness is our entry level harness, and also, one of our most popular harness models. It is designed to present a clean professional look on the job.

The most unique feature of this harness is its webbing wear indicator, which allows you to easily recognize damage.
SURFACETECH WEBBING

Guardian is always working hard to find new ways of increasing the resistance of our harnesses to contamination, while simultaneously improving their durability and functionality. This is why we are very proud to offer Surfacetech technology in many of our webbing-based products.

Surfacetech webbing has microscopic peaks and valleys, which function to greatly reduce the surface area that comes in contact with contaminants. Surfacetech webbing is especially easy to clean, and is highly resistant to dirt, mold, and other contaminants.

Velocity Harness and Hawk Harness
Durable and comfortable, the Seraph Harness is perfectly suited for a variety of fall protection applications. It is designed with a back pad, shoulder pads, and improved elasticity in the shoulders. Quick and easy to adjust and with added break-away lanyard keepers, the Seraph Harness will keep you safe all day long.

The integrated roller buckles hold straps firmly in place, while still allowing for easy adjustment.

Stretch points throughout the harness promote superior flexibility and movement.

Side positioning D-rings on construction harnesses are backed with a wear pad and heavy-duty fabric to increase durability.
Seraph Construction Harness with Side D-Rings
Part # 11173

• 5 points of adjustment
• Adjustable dorsal D-ring
• Two break-away lanyard keepers
• Ergonomic design with extra padding
• Superior flexibility and comfort
• Foam shoulder pads and snap-on back pad reduce fatigue
• Impact indicators

NEW TOUGH CORDURA® HARNESS FABRIC RESISTS ABRASIONS

MORE OPTIONS AVAILABLE TO THE RIGHT
Guardian Fall Protection’s premium harness option, the *Halo Harness* offers the highest degree of safety.

- Five points of adjustment
- Side stretch points
- Adjustable bent aluminum dorsal D-ring
- Two lanyard keepers
- Quick-adjust torso buckles
- Removable leg pads
- Comfort pocket for Cool Packs or Hydrapak®
- Comfortable vest with additional back pad
- Impact indicators
- Powder-coated hardware
- Vinyl cover protects webbing
- Reflective binding for visibility
- Trauma Strap Included (image to the right)

The **Construction Tux Harness** is equipped with side D-rings that make it ideal for Work Positioning applications. A long-standing product offering, the Construction Tux is designed with a harness sewn into an external vest, which reduces the possibility of tangling or contamination of harness webbing.

- No-tangle body wear system for easy donning
- Leg straps zip into the back of the harness for storage
- Dorsal D-ring
- Reflective strips provide enhanced visibility
- Impact indicator

**Class II Hi-Vis Construction Tux**

- Orange mesh
- Brown duck
- Black mesh
- Blue mesh
- Red mesh

**Fire Retardant Construction Tux**

- 100% cotton flame-resistant Banox FR3 material
- Nomex kevlar blend webbing
- Dielectric D-ring and powder-coated buckles

All Harnesses / Part numbers featured are PT / PT
The Deluxe Tux Harness is based on our popular Construction Tux line of harnesses. Designed with Class II Hi-Vis reflective webbing, our Deluxe Tux Harnesses are easy to adjust, and offer several waterproof pockets for electronic devices, such as tablets, smartphones, and radios.

- Expansion zippers for greater comfort
- Waterproof pockets
- Dorsal D-ring
- Reflective strips for increased visibility

WHAT HAPPENS AFTER I FALL?

Suspension Trauma is a potentially life-threatening condition caused by prolonged suspension in a full-body harness after a fall.

Symptoms include:
- Poor blood circulation
- Low blood/oxygen levels
- Heart palpitations
- Dizziness/fainting

The Trauma Strap is an indispensable item for anyone working at heights, and helps to mitigate the effects of suspension trauma (which can occur in as little as 15 minutes) in the event of a fall. By allowing the fallen worker to assume a standing position and relieve pressure on the lower extremities, the Trauma Strap allows better blood flow and reduces fatigue. Compatible with all Guardian full-body harnesses, the Trauma Strap is easy to adjust, and its low profile keeps it out of the way during work.

FEATURES:
- Helps reduce the effects of suspension trauma
- Lightweight and easy to install
- An important part of any rescue plan
- Low profile

SELF-RETRACTING LIFELINES
Guardian has numerous self-retracting lifelines (SRLs), perfectly suited for a wide variety of fall protection applications. Reference the infographics below to determine your ideal SRL. If you have any questions about SRLs, visit www.guardianfall.com or call 1.800.466.6385.

### SRL Classes

<table>
<thead>
<tr>
<th>SRL Classes</th>
<th>Class A</th>
<th>Class B</th>
<th>Leading Edge</th>
</tr>
</thead>
<tbody>
<tr>
<td>Average Arrest Force</td>
<td>1,350 LBS.</td>
<td>900 LBS.</td>
<td>N/A</td>
</tr>
<tr>
<td>Max Potential Deceleration</td>
<td>24&quot;</td>
<td>54&quot;</td>
<td>54&quot; - 102&quot;</td>
</tr>
</tbody>
</table>

ANSI Z359.14-14 establishes three different classes for SRLs. These classes differentiate SRLs based on average arrest force, maximum potential deceleration, and use in LE applications.

### Hook Types

- **Steel Snap Hook**
- **Aluminum Snap Hook**
- **Swivel Steel Hook**
- **Aluminum Rebar Hook**
- **Steel Rebar Hook**
- **Tie-Back Hook**
- **Aluminum Carabiner**

### Understanding Leading Edge (LE)

Guardian LE SRLs must have a cable lifeline, utilize a shock absorbing device, and be permitted for use in LE work. While the ideal position for any attachment point is overhead, LE retractables play an important role because, frequently, the only viable attachment point is at foot level.
Fall clearance calculation shown based on standing worker falling directly in-line with anchor point. Always consider potential swing fall and other hazards when calculating fall clearance.

*Eliminate Swing Fall whenever possible! If Swing Fall exists, always account for additional fall clearance.
NEW & IMPROVED WITH THE SAME PORTABLE & LIGHTWEIGHT DESIGN YOU LOVE.
The 6’ Diablo SRL is compact and lightweight, and its ergonomic housing is shaped to fit right in the palm of your hand. But don’t be fooled by the Diablo’s small size; it is a powerhouse in safety, rated to support workers weighing from 130-420 lbs., and designed with a quick-action braking system that will stop a fall in an instant.

The Diablo can be used on its own, or teamed up with a second Diablo using our triple-locking Dual SRL Bracket to make a Double Diablo, which allows for 100% tie-off.

The Dual SRL Bracket includes a visual indicator to help assure you that it is fully locked and ready for use, and makes assembling a dual leg SRL quick and simple.
The **Diablo Tie-Back SRL** is designed for use in applications where no anchorage connector is available. To use, simply wrap the SRL lifeline around a compatible structural anchor (such as an I-beam or concrete form), connect the tie-back snap hook to the lifeline, and begin work.

**DIABLO ARC FLASH SRL**  
HIGH-STRENGTH NON-SWIVEL, NON-INDICATING HOOK, SWIVEL TOP, & CARABINER

- **Steel Snap Hook**  
- **Aluminum Carabiner**  
- **Aluminum Rebar**  
- **Steel Rebar**  

ASTM F887

The **Diablo Arc Flash SRL** is designed for workers exposed to the risk of arc-flash (also known as flash-over) or other high-energy applications. An arc flash can occur through incidental contact with an energized source, creating a temporary electrical short that can result in extreme conditions of heat, light/fire, and noise. The Diablo Arc Flash SRL ensures workers remain safely tied-off during these catastrophic events. The web is fully compliant with all ASTM F887 testing procedures and offers the maximum safety as required by the NFPA, as well as applicable ANSI testing standards.

**DIABLO WEB TIE-BACK SRL**  
NON-SWIVEL, NON-INDICATING TIE-BACK HOOK, SWIVEL TOP, & CARABINER

- **Tie-Back Hook**  
- **Double SRL Kit**  

DIABLO 2.0
The Diablo Cable SRL-LE takes the performance of our popular Diablo web SRL right to the Leading Edge. Its galvanized steel lifeline and inline (dorsal D-ring mounted) shock absorber means it is approved for foot level tie-off or other applications where workers are exposed to Leading Edge conditions. Also available in double Diablo kits to enable 100% tie-off capability.
The Diablo Cable SRL features a 33’ galvanized cable lifeline, ergonomic handle, and swivel steel snap hook. It is available in a standard or LE model and with standard or nylon coating for the lifeline.

The Diablo Cable Big Block SRL is available in both 50’ and 65’ lengths. Rated for use in LE applications, the Diablo Cable Big Block is built with lightweight and heavy-duty housing.

- Easy to carry
- High-strength composite cable guide
- Non-corrosive components
- Quick-action braking system
- Reinforced nylon housing
HALO SRLS

DURABLE, RELIABLE, & BUILT TO LAST.

The premier SRL option in the marketplace, Halo Series SRLs can do it all. Whether for LE use, standard use, Fall Arrest, or Fall Restraint, there is a durable and high-performing Halo SRL waiting for you.
**Halo SRLs** are manufactured with highly durable Technora webbing or cable and non-corrosive, lightweight components. Halo SRLs stand up to the harshest working conditions.

### Halo SRL

- **Halo Cable SRL**
  - Part #: 10910
  - **Compact design**
  - **Stainless steel and non-corrosive components**
  - **Durable aluminum housing**
  - **Swivel-top and Swivel-hook**

### Halo Web SRL

- **Non Swivel, Non-Indicating Hook, Swivel Top, & Carabiner**
- **Self-retracting lifelines**
The Halo SRL-LE is designed specifically for LE work, and it includes an integrated shock absorbing component that helps minimize forces on the cable that comes into contact with the edge.

The Halo SRL-LE is also a great choice for workers 310-420lbs. in non-leading edge applications.
The Halo Big Block SRL is supremely durable, and incorporates corrosion-resistant stainless steel and aluminum components to ensure superior functionality. This SRL also includes an ergonomic handle and is available in both 50' and 65' models.
The 3-Way Rescue and Retrieval SRL-R is easy to handle, install, and adjust, and is composed of high-quality machine parts that make it both durable and dependable. Easily transition from SRL mode to Rescue/Retrieval mode in seconds.

**WINCH MODE:**
PULLED OUT PLUNGER INDICATES WINCH MODE

Compatible with Arc-O-Pod Part # 10530
Velocity SRLs combine the utmost in safety and durability. The 10’ cable unit can be mounted either at the anchorage connector or at the harness dorsal D-ring, allowing for increased convenience. Longer units mounted at the anchorage connector offer an increased working radius as well as more flexibility when selecting overhead installation locations.

- Galvanized cable or nylon webbing models available
- Available in a variety of lengths
- Durable and lightweight thermoplastic housing
- Carabiner included

- Limits maximum deceleration distances to no more than 60”

**Big Boss Lanyard & Seraph Harness**
Part # 21303 & 11164

**BIG BOSS LANYARD**
**DOUBLE LEG LANYARD WITH 18” EXTENSION D-RING**

- DOUBLE LEG
- STEEL SNAP HOOK
- 6'

- 21310
External Shock Absorbing Lanyards are made with 1" polyester webbing and are available with steel snap or steel rebar hooks. These lanyards limit average arresting forces to no more than 900 lbs. within a maximum 48" deceleration distance.

Double leg External Shock Absorbing Lanyards facilitate 100% tie off.
The Internal Shock Absorbing Lanyard is comprised of heavy-duty outer polyester webbing with a polyester core specifically designed to reduce the impact forces resulting from a fall. Because the shock absorption is built directly into the lanyard there is no need for an external shock absorber, making the Internal Shock Absorbing Lanyard a particularly lightweight option.

Surfacetech webbing is especially easy to clean, and is highly resistant to dirt, mold, and other contaminants.
The 4-in-1 Lanyard is designed for use in a wide variety of applications. This versatile lanyard can be used as an extended free fall lanyard, a harness extension lanyard, a tie-back lanyard, or a dual leg 100% tie-off lanyard.
Stretch Lanyards are ideal for working in tight spaces or around machinery where long lanyards can create a hazard. The Stretch Lanyard’s ability to contract its length from 6’ to 4½’ helps reduce the risk of interference with tools or other objects.

Internal Shock Absorbing Stretch Lanyard  
Part # 01295

External Shock Absorbing Stretch Lanyard  
Part # 11902
Non-Shock Absorbing Lanyards are available in a variety of lengths. Because they do not include a shock absorbing component, these lanyards may only be used in Fall Restraint and not Fall Arrest applications.
The **Triple Lock Wrap Lanyard** can function as both a standard shock absorbing lanyard, as well as a tie-back lanyard.

**Triple-Lock Wrap Lanyard**

The Adjustable Lanyard can be easily adjusted from between 4'-6' in length. It is available with or without an integrated shock absorber.
**Extension Lanyards** are attached to the harness before use to lower the dorsal D-ring attachment point and are ideal for workers who cannot comfortably reach the D-ring on their harness.

Cable Lanyards are perfect for use in applications where the potential exists for exposure to high heat, sharp, or abrasive edges. They are available with either snap hooks or rebar hooks, as well as an integrated shock absorbing component.

Coated Cable Lanyards are perfect for use in welding and high-heat applications. They offer a removable, flame-resistant cover over the shock absorber to protect against temperature hazards.

The Double Leg Rope Lanyard ensures that workers will always be able to remain connected to an anchor, even when climbing or moving around a work surface.

ANCHOR POINTS
Anchor Points

Guardian has an anchor point option for nearly any job. Whether working with wood, steel, concrete, and more, Guardian has an anchor that will meet your jobsite's needs.

Anchor Installation

Guardian carries a wide variety of anchor points (over 100 in fact!). Each anchor point is designed for various substrates. Be sure to reference your instructions prior to selecting an anchor to ensure it's the right anchor for the job.

Remember!
When Connecting to an Anchor Point

Never connect more than one hook to the anchor attachment point at one time!

All product instructions available for download on our website!
The choice of industry professionals for many years, the Beamer 2000+ now features a swivel D-ring and improved adjustability. Easily sliding along beams, the Beamer 2000+ works with you, not against you.
The **Beamer 2000** is a versatile Fall Arrest anchor designed for use either overhead or at foot level. Suitable for installation on beams, the Beamer 2000 trails behind the user during work, and is quick and easy to install and adjust.

The **Beamer 2000+** is the new and improved version of the Beamer 2000. It offers a D-ring that both pivots and swivels, adjustment levers at the top of the anchor instead of the side to reduce the likelihood of accidental impact adjusters, and it weighs less.

The **Beamer 3000** expands upon the features of the Beamer 2000 by offering two points of adjustment for even greater versatility.
The **Beamer BBC** is a Fall Arrest anchor designed for use on the top or bottom flange of a steel beam. It shares many of the features of its relative, the **Beamer 2000**, but with models available to fit an even wider variety of beam sizes.

### Beamer BBC

**Made with Stainless Steel, Galvanized Steel, & Aluminum**

- **Fits Flanges 2.5” Thick**
- **For Use on Top or Bottom**
  - **Fits Flanges 2.5”-4” Thick**

- **Fits Flanges 8”-18” Wide Flange**
- **Fits Flanges 2.5”-4” Thick**

- **Fits Flanges 12”-24” Wide Flange**
- **Fits Flanges 2.5”-4” Thick**

- **Fits up to 2½” Flange**
- **Fits Flanges 12”-30” Wide**

### Minotaur Beamer

Part # 00106

- **Made with Aluminum, Bronze Manganese, Zinc-Plated Steel, & Nickel-Plated Steel**

Featuring the same high performance and durability of Guardian’s other Beamer products, the **Minotaur Beamer** is specially designed for attachment to wider beam flanges.
**Vertical Beamer 3000**  
Part # 00142

Fits flanges from .25"-1.25" thick  
**Vertical Beamer 3000**  
Made with aluminum, stainless steel, & chrome-plated steel

Fits flanges 4"-14" wide  
For use on top or bottom

Suitable for installation either vertically or horizontally, the O-Torque Beamer clamps to compatibly sized beams to establish a stationary anchor point. Use the O-Torque as a standalone anchorage connector, or as an anchor for a horizontal lifeline system.

The **Vertical Beamer 3000** is suitable for installation onto either vertical or horizontal I-beams. The **Vertical Beamer 3000** can be installed by one person without the need for any tools or special equipment, and its durable components allow it to stand up against even the harshest jobsite conditions.

**Beamer Trolley Anchor**  
Part # 00215

Fits flanges up to .9" thick  
**Beamer Trolley Anchor**  
Made of stainless steel, aluminum, nickel-plated steel, & polyester

Fits flanges 3"-10" wide  
For use on bottom only

The **Beamer Trolley Anchor** is intended for installation to steel beams, and is specially designed with rollers for smooth travel along the beam. The locking toggles allow for easy adjustment and eliminate the risk of accidental clamp slippage.
The **Surfacetech Cross Arm Strap** merges our **Premium Cross Arm Strap** with SurfaceTech technology, making the anchor highly resistant to dirt and contamination, as well as much easier to clean.

**Cross Arm Strap** easily install by wrapping around and cinching down to a structural anchor, and are ideal for use in locations where substrate penetrations are not desired.

**Premium Cross Arm Straps** are designed with dual reinforced webbing for superior durability and resistance to wear.
Galvanized steel 5/16” diameter **Cable Anchorage Slings** function just like a Cross Arm Strap, and, install by looping around a structural beam or anchorage. Nylon-coated models are also available, which provide even greater durability, as well as help protect the structure from damage.

**PREMIUM ROLLER SLING ANCHOR**

**GALVANIZED CABLE WITH POLYURETHANE ROLLERS**

*The Roller Sling Anchor* installs around a structural anchor and trails behind the user during work.
Guardian offers a wide variety of Concrete Anchor Straps. Concrete Anchor Straps install to rebar or other compatible structural anchors, and are then cast in place. When strap is no longer needed, simply cut away and discard.

ACE Anchor
Made with galvanized steel. Requires 3,000 psi concrete.

The ACE Anchor is a cast-in-place anchor designed for installation during the concrete pouring stage of construction.
Pioneered by Guardian Fall Protection, **CB Anchors** are perhaps the most proven fall protection anchors on the market. Intended for permanent installations, CB Anchors are designed for installation onto wood, metal, and concrete substrates (fasteners are included for wood and metal applications). CB Anchors are composed of durable, galvanized steel, and are an excellent choice for nearly any fall protection application, including for use in combination with a compatible horizontal lifeline system.

**CB-1-W**
Weld-on steel anchor point.

Part # 00610

**CB-1-B**
Steel bolt-on anchor point.

- Powder-coated steel: 00600
- Stainless steel: 00600-SS
- Galvanized steel: 00601

**Backer plate for CB-1-B**
Galvanized: 10685
A straightforward and durable family of D-ring anchorage connectors, **D-bolt Forged Anchors** can be installed on a wide variety of substrates, including wood, steel, and concrete. Ideal options for when anchorage connectors will be needed for long-term use, D-bolt Anchors are designed to stand up to the harsh conditions of construction sites, can be used in any fall protection application, and are compatible with horizontal lifelines.

**D-BOLT FORGED ANCHOR**
BOLT-ON ANCHOR POINT FOR WOOD, STEEL, AND CONCRETE. FASTENER NOT INCLUDED EXCEPT FOR #00374. MADE WITH GALVANIZED STEEL.

**D-RING 2 HOLE ANCHOR PLATE**
STAINLESS STEEL BOLT OR WELD-ON ANCHOR POINT.
The **MEGA Swivel Anchor** is designed for installation into either steel or concrete, and swivels a full $360^\circ$ to help reduce the risk for the connecting device to snag or catch on the anchor. Available in either 5K or 10K models.

An easy to install concrete anchor point, the **Concrete Swivel Anchor** is manufactured with a specially designed indicating bolt that allows the user to clearly see when the anchor is installed properly.

---

**MEGA SWIVEL ANCHOR**

10K Mega Swivel with Bolt and Washer

10K STRAIGHT LOOP INSERT
MADE WITH STAINLESS STEEL

The 10K Straight Loop Insert is installed during the initial concrete pouring stage of construction, and offers a permanent installation location for Guardian Mega Swivel Anchors and the D-Bolt Forged Anchorage Connector. Place in the 10K Straight Loop Insert from the beginning of the project, and be ready to attach an anchor and get to work as soon as the concrete is set.

10K MEGA SWIVEL W/ BOLT & WASHER
MADE WITH STAINLESS STEEL

00233

00258

WIRE HOOK ANCHOR
MADE WITH STAINLESS STEEL

The Wire Hook Anchor is lightweight and easy to install to any compatibly sized structural anchor, and is ideal for workers who transition between many different locations over the course of their day.

01860

DROP THROUGH ANCHOR
MADE WITH STAINLESS STEEL.
¼" THICK STEEL PLATE. 8½" CABLE WITH SWIVEL D-RING.

- Easy to Install
- Lightweight & durable
- Custom lengths available

4” STEEL PLATE FOR HOLES UP TO 2” DIAMETER 00516
6” STEEL PLATE FOR HOLES UP TO 3” DIAMETER 00517
12” STEEL PLATE FOR HOLES UP TO 6” DIAMETER 00518

We all know that certain jobsites can be difficult when it comes to the installation of anchorage connectors. Overhead anchors can be especially troublesome but with the Drop-Through Anchor customers now have another option. To install, either pre-drill a compatibly sized hole into the floor or walking surface (or simply find an existing hole), pass the anchor cable through the hole, and then move down to the level below, and attach to the anchor. When the job is complete, the anchor can easily be picked up and moved to the next job.
G-BOLT ANCHORS
INSTALL INTO PRE-DRILLED CONCRETE. MADE FROM STEEL, GALVANIZED STEEL, & ALUMINUM.

- 5K CONCRETE ANCHOR 00235
- 10K CONCRETE ANCHOR 00236
- 5K PRECAST HOLLOW CORE ANCHOR 00365

- Compress toggle to install or remove
- Lightweight and durable
- Compatible with HLLs

MINING ANCHORS
IDEAL FOR USE DURING MINING AND TUNNELING WORK. INSERTS DIRECTLY INTO COMPATIBLY SIZED FRICTION ROCK BOLT.

- 10K FALL PROTECTION MINING ANCHOR 00281

BOLT HOLE ANCHOR
REUSABLE, GALVANIZED STEEL ANCHOR. SIMPLY SQUEEZE AND RELEASE TO INSTALL/REMOVE. COMPATIBLE WITH HOLE DIAMETERS FROM ¾”-1¼”.

- Bolt Hole Anchor Part # 00230
THE MIGHTY GROUND-UP ANCHOR SYSTEM

SAFELY INSTALLED FROM THE GROUND
The **Ground-Up Anchor System** allows for the installation of an anchor from the safety of the ground. The worker avoids exposure to a dangerous fall during installation.

The Ground-Up Anchor System consists of a cast-in-place anchor receiver (for either wood or metal framing), a removable anchorage connector, the remote grip system, and an extension pole. The grip system attaches to the extension pole, which then enables both placement and retrieval of the anchor point.

- **Ground-Up Anchor – 5K anchor with swivel D-ring**
  - 00160
- **Ground-Up Anchor Remote Grip System**
  - Compatible with any 3/8” X 5 ACME thread painter pole
  - 00161
- **Ground-Up Anchor Receiver** (for use with metal framing)
  - 00162
- **Ground-Up Anchor Receiver** (for use with wood framing)
  - 00163
- **Ground-Up Extension Pole**
  - 00164
STANDING SEAM ANCHORS

STANDING SEAM ROOF CLAMP
MADE WITH POWDER-COATED & GALVANIZED STEEL. FOR USE WITH SRLS.

- 360° rotation
- Adjustable from 24" to 36"
- Compatible with Guardian SRLs up to 50'
- Use with Adapter (Part # 10975) for SRLs from 50' - 65' in length

PERMANENT ADJUSTABLE STANDING SEAM ROOF ANCHOR
MADE WITH LIGHTWEIGHT ALUMINUM & STAINLESS STEEL. PERMANENT OR REUSABLE ANCHORAGE.

- Tie-off ring swivels 360°
- Adjusts to fit roof seams from 12"-24"
- Utilizes S5-Clamps
- Compatible with Absorbinator HLL

2-WAY UNIVERSAL STANDING SEAM ROOF CLAMP
MADE WITH GALVANIZED STEEL.

- Unique reversible installation accommodates various seam sizes
- Quick and easy to install
SCREW-DOWN ANCHORS

SCREW-DOWN METAL ROOF ANCHOR
MADE WITH POWDER-COATED STEEL.
INSTALLS ON WOOD OR METAL SUBSTRATES.

- Rotates 360°
- Compatible with Guardian SRLs up to 50'
- Use with Adapter (Part # 10975) for SRLs from 50' - 65' in length

00255

4-WAY PLATE ANCHOR
MADE WITH POWDER-COATED STEEL.

- For installation onto wood, metal (as thin as 24 gauge), and concrete substrates
- Can be installed on flat roofs, pitched roofs, or vertically onto wall
- Supports one worker in Fall Arrest, or two workers in Fall Restraint
- Offers a connection point for work in any direction
- Ideal for use in HLL systems

00691
Guardian’s passion for innovation began way back in 1993 with our very first product, the Skyhook Anchor. The inventor was tasked by an inspector to install a tie-off point for his fall protection equipment, to which he replied, “What am I supposed to connect to, the sky?” Clearly that wasn’t an option, so he came up with the next best thing! Designed to fit a wide variety of roof pitches, the Skyhook easily installs at the roof peak to provide a safe and convenient fall protection anchor point.
**Skyhook Anchors**

**Skyhook Anchor**

HITCHCLIP® ANCHORS

Designed by a contractor for contractors, the HitchClip anchor is extremely lightweight, and its low profile and multiple color options make it ideal for permanent installation onto residential roofs. This anchor does not require flashing making it easy to install and its offset installation holes prevent damage to the roof truss.
TEMPER ANCHORS
MADE WITH GALVANIZED STEEL.
FITS ROOF PITCHES FROM FLAT - 12/12.

TEMPER ANCHOR
00455

• Easy to install
• Lightweight and durable
• Fasteners included
• Installs to wood, metal, or concrete
• Offset install holes prevent truss from splitting
• Ability to lay flat
• Superior screened label

**TRENCH BOX ANCHOR**
MADE WITH GALVANIZED STEEL. FITS TRENCH WALLS UP TO 10" THICK

- **TRENCH BOX ANCHOR**
  - 15192

- **TRENCH BOX GUARDRAIL RECIEVER**
  - 15193

The **Trench Box Anchor System** allows for the installation of guardrails around trenches, as well as functions as a fall protection anchor point. Extremely durable and simple to install, the Trench Box Anchor System offers superior versatility.
**Non-penetrating anchors**

- Easy to install
- Lightweight and durable
- Retractable cradle swivels 360°
- Installs at base of window or door frame
- Simply attach to D-ring or use with SRL and SRL Cradle (Part # 00380)

**Gap Anchor with Swivel Top SRL Cradle**
Part # 15176 & 00380

**Angel Anchor System**
Made with zinc plated steel. Non-penetrating anchor.

- SRL (Part # 10925) and Swivel Top (Part # 00380) sold separately

The **Angel Anchor System** is the ideal solution for a versatile single tie-off point when penetrating the substrate is not an option. Its specially designed 3-piece “spine” makes it easier to transport and assemble, and allows for the anchor to be used on surfaces up to a 5° slope. This anchor is corrosion resistant and supremely durable.

**EcoAnchor**
Made with fire-resistant neoprene. Non-penetrating anchor.

- The EcoAnchor is a water filled counterweight anchor system. The EcoAnchor has been tested and approved on a wide variety of low slope roofs. The EcoAnchor weighs less than 17 lbs. when empty, 948 lbs. when filled with water and requires no penetrations into the substrate.
The *Hydrajaws System* tests fasteners and anchors. It consists of a mechanical screw arrangement acting through a hydraulic load cell, which measures the load applied to the fixture directly. The resulting load value is then indicated on the dial-type or optional digital gauge.

The tester has a built-in movement indicator scale (50mm standard or 100mm optional) to show “first movement” on the fixing prior to the test load being applied. The tester is supplied as an integral part of the tester kit.

An accessory for the 2000C Deluxe Hydrajaws testing kit, the Guardian Fall Protection *Hydrajaws Adapter* is designed to make load testing possible over gaps in the substrate. It may also be used to perform testing of the CB-12 Anchor.
GUARDRAILS
The Fall Protection Hierarchy should be considered when designing fall protection solutions for both existing and new facilities.

1. **Eliminate** - Eliminate the hazard by creating a physical barrier, keeping workers from the fall hazard.
2. **Fall Prevention** - Isolating or separating the hazard or hazardous work practice from employees or others.
3. **Fall Restraint** - Securing the worker to an anchorage using a lanyard or lifeline short enough so that it will prevent the person’s center of gravity from reaching the fall hazard.
4. **Fall Arrest** - A system designed to stop a worker after a fall has begun.
G-Rail with
QuickSet Baseplate
Part # 15183 & 15178

Guardian’s freestanding Safety G-Rail is available in lengths of 6’, 8’, 10’, and 12’, and is made from powder-coated and galvanized steel for supreme durability and weather resistance. Compatible with both the QuickSet Multi-Directional Baseplate and Guardrail Baseplate.

Collapsible G-Rail
Part # 15190

The Collapsible Guardrail System is easy to install, and compatible with all Guardian baseplates. The Collapsible Guardrail System is designed to collapse in towards the work area to allow entry to/exit from controlled access areas.

Outrigger Post
Part # 15160

The Outrigger Post is installed perpendicular to a continuous run and is required at both ends of any interruption in a guardrail system. It can be inconvenient to use a full size guardrail as an outrigger, which makes the Guardian Outrigger Post an ideal solution.
**GUARDRAIL BASEPLATE**
**MADE WITH GALVANIZED STEEL.**

The **Guardrail Baseplate** is composed of galvanized steel for superior durability and weather resistance, and is designed to reduce potential rooftop stain or rust. It is skid-resistant and requires no rooftop attachment.

**GUARDRAIL KNUCKLE**
**MADE WITH GALVANIZED STEEL.**
**INSTALLS ONTO CONCRETE, METAL, OR WOOD.**

**QUICKSET MULTI-DIRECTIONAL BASEPLATE**
**MADE WITH POWDER-COATED STEEL.**

The **QuickSet Multi-Directional Baseplate** allows the ability to run rails in many directions, and requires no penetration of the substrate. It also offers four toe-board attachment points, and is composed of powder-coated steel.

**TOEBOARD ATTACHMENT**
**MADE OF GALVANIZED STEEL.**
**COMPATIBLE WITH GUARDIAN BASEPLATE # 15180 AND 2" X 4" LUMBER**

- **10”**
- **21 ¼”**

*FASTENERS NOT INCLUDED*
Swing gate

Guardrail safety swing gate made with durable Powder-coated steel.

- Fits up to 2" diameter rails
- Can also be mounted to angle iron
- Adjusts maximum 4" below stated width

Establish entry and exit point to a controlled access area with the Guardrail Safety Swing Gate.

Guardrail Safety Swing Gate
Made with Durable Powder-Coated Steel.

18"  15105
24"  15110
27"  15111
36"  15112

82
SEVEN FUNCTIONS IN ONE EASY TO USE, HEAVY-DUTY STEEL PARAPET SYSTEM.

CLAMP DOWN ON SAFETY.

SUPREMELY VERSATILE NON-CORROSIVE COMPONENTS EASY TO INSTALL IN ANY APPLICATION
The **Alligator Parapet Roof System** is the ultimate multi-functional and durable guardrail system. It is composed of heavy-duty steel, making it extremely resistant to corrosion and damage, and can be adjusted to fit any parapet wall from 2” - 16”. This system features adjustable height rails to help ensure compliance with the 42” (+/- 3”) top rail height required by OSHA, allowing it to be used on a variety of parapet heights. It can also be installed onto pitched and barrel roofs, on a side-wall, corner mounted, and mounted flush to a roof.

The Alligator Guardrail Posts are compatible with both 2” X 4” boards and Snap-On Metal Rails (Part #61074).

1. PARAPET CLAMP
2. SIDE CONNECTION
3. OUTSIDE CORNER
4. INSIDE CORNER
5. FLUSH CONNECTION
6. SIDE CONNECTION WITH GUSSET
7. ANGLE CLAMP
The **Parapet Clamp Guardrail System** is fast and easy to install. Each Parapet Clamp includes a corresponding guardrail post, which is compatible with both 2” X 4” boards or our Snap-On Metal Rails. This system can fit any parapet from 10” – 24” in thickness, and an entire system can be easily assembled by one person.

**PARAPET CLAMP GUARDRAIL SYSTEM**
*Made with Powder-Coated Steel.*

- Fits wide range of parapets (minimum 7” high)
- OSHA-compliant guardrail system
- Durable, non-corrosive components
- 8’ max spacing
- Easy to install

The **Parapet Anchor System** can be used to accommodate guardrail posts, as a standalone anchor point, or in conjunction with a horizontal lifeline (when installed perpendicular to the parapet only). This anchor system can adjust to fit parapet walls 4” – 20”. It also has large, easy-to-grip adjustment handles for quick set-up.

Please note that this system is not intended for simultaneous Fall Prevention and Fall Arrest use.

**PARAPET ANCHOR FOR GUARDRAILS**
*Made with Galvanized Steel.*

- Adjusts to fit parapet walls between 4” - 20” wide
- Can be used as anchor point for Fall Arrest
- OSHA-compliant guardrail system
- Easy to install
The **C-Slab Grabber** is the perfect solution for installing guardrail systems on concrete slabs. It includes an anti-slip grip, a quick-adjust handle, and a back-up safety pin (to prevent accidental detachment). The C-Slab Grabber is fast and easy to install, and adjusts to fit concrete slabs up to 36" thick. It is compatible with 2" X 4" and 2" X 6" boards, as well as cable or Snap-On Metal Rails (Part # 61074).

The **Residential Guardrail System** is intended for steep roof pitches ranging from 6/12 to 12/12. This versatile and lightweight system is easy to install and remove, and is compact for convenient storage. Composed of powder-coated steel, it is designed for superior durability and weather resistance.
GOOSE WARNING LINE STANCHION
MADE OF ALUMINUM. FOR USE WITH PART # 15231

The Goose Warning Line Stanchion features a carrying handle, spring-loaded legs, is 39” tall, and is composed of aluminum.

WARNING FLAG LINE
105’ NYLON LINE.
FOR USE WITH PART #’S 15227, 15225 OR 15039

Our Flag Line is compatible with the Goose Warning Line Stanchion and Single Warning Line Stanchion, as well as the Permanent Warning Line Mast. Its heavy-duty nylon cord is supremely durable, and its large, heat-sealed flags are spaced every 2’ for extra visibility.

WARNING LINE STANCHION
MADE OF POWDER-COATED STEEL.
FOR USE WITH PART # 15231

The Warning Line Stanchion is specially designed for use with a reusable warning line. 39” tall and composed of powder-coated steel, the Warning Line Stanchion is easy to set-up and convenient to break down and carry.

STAMPED STEEL WARNING FLAG
MADE OF POWDER-COATED STEEL.
FOR USE WITH COATED CABLE PART # 01401

5/32” VINYL-COATED WIRE ROPE - CUT TO ORDER

WARNING LINE POST
MADE OF POWDER-COATED STEEL.
FOR USE WITH GUARDIAN PART #’S 15178 & 15180
Our lightweight welded steel Universal Guardrail Posts are designed to work with our variety of guardrail mounting options.

Compatible with our Universal Guardrail Posts, the Snap-On Metal Rail eliminates the need to use 2" X 4" boards to function as guardrails. Zinc-plated for superior weather resistance, the Snap-On Metal Rail is both lightweight and reusable, and locks on to guardrail posts to eliminate all risk of accidental detachment.
The Stacker Bracket System is used to install a safe working surface on either the exterior or interior of a building. Utilizing top clamps, hanger brackets, frames, end rails, and toeboard attachments, this system can be used in place of more traditional scaffolding equipment. Compatible with 2" X 4" boards and Snap-on Metal Rails.

**Stacker Bracket System**
Made of Powder-Coated Steel.

1. Stacker Bracket End Rail
2. Stacker Bracket Frame
3. Toeboard Attachment
4. Stacker Bracket Top Clamp

**Stacker Bracket Top Clamps** are manufactured in a variety of sizes to fit rails of various widths, and are composed of powder-coated steel for superior durability and weather resistance.

- Attaches to Stacker Bracket Frame
- Eye bolt brings bracket flush to outside wall
- Backup safety mechanism with Grade 5 bolt and pin
Guardrail Receivers may be installed on wood, metal, and concrete substrates, and are composed of powder-coated steel for superior durability and weather resistance.

Guardrail Receivers

- **Guardrail Post Receiver**
  - Part # 15158
- **2" X 4" Receiver**
  - Part # 61029

Stair Mounts are the ideal solution for the installation of guardrails on unfinished stair cases. Composed of powder-coated steel, Stair Mounts are suitable for installation onto both wood and concrete substrates.

- **Guardrail Post Stair Mount**
  - Part # 61140
- **2" X 4" Stair Mount**
  - Part # 61141
The **Guardrail Angel Boot** is used in the assembly of a wooden guardrail system. Use two 2" X 4" boards to assemble the vertical member, and additional 2" X 4" boards for railings.

**Guardrail Gussets** are simple to install with either screws or nails, and allow for guardrail systems to be installed flush with outside walls. Compatible with all Guardian Universal Guardrail Posts.

The **Friction Fit Bracket** is specially designed to adjust and securely fit onto fascia boards. This bracket is supremely durable, and may be used in combination with all Guardian Universal Guardrail Posts.
HORIZONTAL LIFELINES
Horizontal lifelines (HLLs) provide an anchor point that can span long distances, and allow for multiple workers to attach simultaneously. Made from either cable or rope, HLLs are a great option for nearly any type of construction work.

**UNDERSTANDING SPANS**

**LIFELINE MATERIALS**

**CABLE**
Ideal for permanent installation applications, cable lifelines are extremely resistant to damage.

**POLYESTER**
Polyester lifelines are manufactured with integral shock absorbing functionality and superior strength.

**KERNMANTLE**
The most durable and flexible rope offered by Guardian, with a dual-layer design to resist damage.

**REMEMBER! WHEN CALCULATING FALL CLEARANCE**

Always account for deflection in the line!
Suitable for loading in any direction, the **Beamguard System**, can be installed onto structural beams of a variety of sizes. Requiring no special equipment, the Beamguard can be installed and adjusted with basic hand tools.

**BEAMGUARD SYSTEM**
MADE OF POWDER-COATED STEEL. HORIZONTAL LIFELINE POST OR ANCHOR.

BIG BOSS HORIZONTAL LIFELINE

Make it simple for 4 workers to easily move around the jobsite.

Includes: 82' polyester horizontal lifeline, Rope Tensioner, 4 O-Rings, & SOS Bag
**BIG BOSS HLL KIT**

MADE OF POWDER-COATED STEEL & POLYESTER.
82' HORIZONTAL LIFELINE, FOR UP TO FOUR USERS.

The **Big Boss HLL Kit** is a temporary, reusable lifeline system that can be used by up to four workers in Fall Arrest applications. It spans a maximum of 82', and includes a rope bag for easy transportation and storage.

**BIG BOSS HITCHCLIP® HLL KIT**

MADE OF POWDER-COATED STEEL & POLYESTER.
82' HORIZONTAL LIFELINE, FOR UP TO TWO USERS.

This **Big Boss HitchClip HLL Kit** is quick and easy to install, and allows a maximum two workers to work in Fall Arrest applications. The HitchClip anchorage connectors can also act as individual tie-off points when not used in combination with the HLL, making this Big Boss HLL Kit not only supremely functional, but versatile as well.

**BIG BOSS ECOANCHOR HLL KIT**

MADE OF POWDER-COATED STEEL & POLYESTER.
82' HORIZONTAL LIFELINE, FOR UP TO TWO USERS.

The **Big Boss EcoAnchor HLL Kit** consists of (2) EcoAnchors and (1) Big Boss HLL System. The EcoAnchor is an industry-leading counterweight anchorage connector that requires no penetration of the substrate. Weighing only 17 lbs., when empty, it fills completely with water within 8 to 10 minutes and then is ready for use. For use by a maximum of two workers in Fall Restraint applications only.
Polyester and Kernmantle HLLs are simple to install temporary systems that span between fixed anchorage points, and provide a safe horizontal anchorage for multiple users to move freely around a work space. These devices are simple to install, easily assembled by one person, and can support a maximum of two workers in Fall Arrest applications.

**POLYESTER HLL KIT**
*Reusable, Two-Person Polyester Lifeline Kit*

- 30' 04625
- 60' 04628
- 100' 04630

**Includes:** Rope Tensioner, Polyester Rope, O-Rings, Cross Arm Straps, Self-Locking Carabiners, and Ultrasack.

**KERNMANTLE HLL KIT**
*Reusable, Two-Person Kernmantle Lifeline with Shock Pack*

- 30' 04638
- 60' 04639
- 100' 04640

**Includes:** Rope Tensioner, Kernmantle Rope, O-Rings, Cross Arm Straps, Shock Pack, Self-Locking Carabiners, and Ultrasack.
The Absorbinator is an energy absorbing component of a cable HLL system. It absorbs and reduces impact forces resulting from the energy generated by a fall. One Absorbinator is required for HLL systems up to 60’ and two Absorbinators are required for HLL systems longer than 60’.

Absorbinator kits are available with a wide variety of components to accommodate almost any installation. Each kit varies depending on lengths and column mounting options.
VERTICAL LIFELINES
Ideal for work in climbing, residential construction, and more, vertical lifelines offer incredible versatility and functionality. Use in combination with either trailing rope/cable grabs or positioning devices.

**LIFELINE MATERIALS**

- **CABLE**
  Ideal for permanent installation applications, cable lifelines are extremely resistant to damage.

- **POLYDAC**
  Polydac Rope is highly resistant to rot or mildew, and offers resistance to most alkalis and solvents.

- **POLYSTEEL**
  Resistant to nearly all water absorption, and will not swell or weaken when wet.

**REMEMBER! WHEN CALCULATING FALL CLEARANCE**

Always consider swing fall when not working in line with your anchor.

**ROPE GRAB VS. POSITIONING DEVICE**

**ROPE GRAB**
Rope Grabs move easily along rope, giving workers two free hands. Locks automatically during falls.

**ROPE POSITIONING DEVICE**
Rope Positioning Devices move along rope when squeezed and pulled into position by the worker. Locks automatically during falls.
The 5/8” diameter PolySteel Rope is ideal for high-moisture environments because it limits water absorption and is highly resistant to ultraviolet light.

The 3-Strand Polydac Rope is one of the strongest conventional ropes available. It is highly resistant to rot and mildew, and has excellent resistance to alkalis and most solvents.
**PolySteel & Polydac VLA**

**PolySteel Vertical Lifeline Assembly**
Includes ⅝” PolySteel rope, shock absorber, positioning device, & snap hooks

**Polydac VLA & Monster Harness**
Part # 11323 & 493191
ROPE POSITIONING DEVICE
MADE WITH ZINC PLATED STEEL. FITS ROPES FROM ½” TO ⅝” IN DIAMETER.

The Rope Positioning Device is easy to install and designed to lock automatically in the event of a fall. Simply squeeze the Rope Positioning Device to unlock and move along the rope.

ROPE GRABS
COMPATIBLE WITH ROPES ½” TO ⅝’ IN DIAMETER. DESIGNED TO LOCK AUTOMATICALLY IN THE EVENT OF A FALL.

ROPE ANCHOR
MADE WITH ANODIZED ALUMINUM. STAYS TIGHT WHILE REMAINING SIMPLE TO UNTIE.

The Rope Anchor helps in the installation of a vertical lifeline around a structural anchor. Rated to withstand loads up to 5,000 lbs.
The **Cable Ladder System** is intended for permanent installations, and is ideal for locations where workers need to climb to and from a raised location on a regular basis. The Cable Ladder System is available in 100’, 200’, and 300’ lengths, and is extremely durable and weather resistant. Workers simply need to attach their compatible cable grab to the cable running down the center of the ladder, and they are fully protected from falls as they climb.

**Cable Ladder System & Cyclone Tower Harness**
Part # 04810 & 21083

- Sealed anchor head with impact attenuator
- Permanently secured forged eye bolt
- Adjustable clamp brackets
- Permanently swaged cable sleeves
## ABCs of Fall Protection

If the risk of falling exists, you require the following:

<table>
<thead>
<tr>
<th>Anchor Point</th>
<th>The Equipment your connector attaches to. Check the worker weight capacity of the anchor!</th>
</tr>
</thead>
<tbody>
<tr>
<td>Body Wear</td>
<td>A full-body harness with dorsal (back) D-ring. It is essential to take the time to fit the harness properly!</td>
</tr>
<tr>
<td>Connector</td>
<td>Lanyard, self-retracting lifeline (SRL), or vertical lifeline (VLL). Consider the total available fall clearance when selecting the connecting device!</td>
</tr>
</tbody>
</table>

Our kits are designed to get you more of the components needed to assemble a complete fall safety system.
The simple, all-in-one solution for anyone working on a roof, the Bucket of Safe-Tie is a complete personal fall protection system. A harness, lifeline, and anchor all in a convenient carrying bucket! What could be better?
Built for the roofer, by the roofer, the **Bucket of Safe-Tie** includes everything you need for a complete fall protection system all in one place. It includes a vertical lifeline, full-body harness (size S – L), anchor point(s), and Storage Bucket.

The **Sack of Safety** is a premium, all-inclusive fall protection kit. It includes a vertical lifeline, full-body harness (size S – L), anchor point(s), and SOS Backpack.
LADDER SAFETY
Falls from ladders represent a large percentage of the injuries resulting from falls every year. Through the simple use of ladder safety equipment, climbing ladders can easily be made significantly safer.

**DID YOU KNOW?**

**TOP 10**

Ladders were in the top 10 for most cited OSHA violations this last year!

**REMEMBER!**

OSHA 1926.1053(B)(1)

“When portable ladders are used for access to an upper landing surface, the ladder side rails shall extend at least 3 feet (.9 m) above the upper landing surface to which the ladder is used to gain access.”

**THE ULTIMATE IN LADDER SAFETY**

- **Self Closing Gate** Part #10798
- **Ladder Extension** Part #10800
- **Rung Step** Part #2477
- **Ladder Dolly** Part #10825
- **Ladder Leveler** Part #2475
The **Safe-T Ladder Extension System** attaches to the top of a ladder to provide a safe and easy transition from the ladder to a raised surface. It requires no tools, drilling, or bolting to install, and is one of the most effective means of improving the safety of nearly any extension ladder. Once installed, it provides two offsetting handrails that offer a point of walk-through to step on or off the ladder. This patented piece of equipment assists workers in complying with OSHA standard 1926.1053(b), which requires ladder rails to extend a minimum of 3’ above the working surface.

**SAFE-T LADDER EXTENSION SYSTEM**

*Easy to install powder-coated aluminum ladder extension. Compatible ladder rail dimensions: width: 1 ¾” max depth: 3 ¾” max.*

- **SINGLE LADDER EXTENSION**: 10800
- **6-PACK LADDER EXTENSION**: 10804

**SAFE-T SELF-CLOSING GATE**

*Made of powder-coated steel. Lightweight & durable ladder gate.*

- **10798**

The **Safe-T Self-Closing Gate**, designed for use in combination with the Safe-T Ladder Extension, is perfect for providing additional protection when climbing off or onto a ladder. It includes a self-closing mechanism, is both lightweight and durable, and is compliant with all applicable OSHA regulations.
Stop crawling off your ladder.
Safely walk through your ladder.

SAFE-T LADDER EXTENSION

Attaches to the top of nearly any ladder without the use of tools, and provides a safe transition point from ladder to roof. Helps meet OSHA regulation for ladder rails to extend 36” above the roof edge.
Ladder Stability Tools

Ladder Stability Anchor
Made of aluminum. Includes (2) 4’ Velcro straps for easy install.

The Ladder Stability Anchor functions to clamp to fascia board and then secure to the top rung of a ladder with two 4’ long Velcro straps ensuring that the ladder will not fall or move.

Ladder Assist
Made of galvanized steel. Spring-loaded ladder hand support.

The Ladder Assist is used to provide additional support for workers who are transitioning from a fixed ladder to a raised working surface. It easily attaches to the top rungs of nearly any fixed ladder, and features a spring-loaded design for easy, one-handed operation. Please note that the Ladder Assist is not a Fall Arrest anchor.

BaseMate® Ladder Leveler
Lightweight & compact, tested at 1,200 lbs. Easily attaches to ladder with no penetration. Ideal for positioning ladder on uneven surfaces.

Ladder Rung Step
Made of lightweight reinforced aluminum. Designed to reduce worker fatigue by expanding the foot support of a worker.

Corner Buddy Ladder Stabilizer
Made of powder-coated steel. Lightweight & weather resistant. Connects to most ladders.

Part # 2475

Part # 2477

Part # 2470

Part # 2474
JACKS, DOLLIES, & HOOKS

The Ladder Jack installs over consecutive ladder rungs, can be used on either side of a ladder, and is ideal for painting, siding, and repair applications. This jack is easy to both install and remove, and will accommodate planking up to 18” wide when used in combination with a paired Ladder Jack.

Ladder Jacks
Made of aluminum, easy to install.

- 2-Rung Ladder Jack
- 2-Rung Ladder Jack (Pair)
- 3-Rung Ladder Jack
- 3-Rung Ladder Jack (Pair)

Ladder Dolly
Lightweight & weather resistant. Connects to most ladders.

- Ladder Dolly Standard
- Ladder Dolly Wide

Ladder Hook
Made of powder-coated steel. Designed to fit most ladders. Ideal for securing ladders to roofs peak.

- Ladder Hook No Wheel
- Ladder Hook With Wheel

The Ladder Dolly is specially designed for use by a single worker, and reduces the carrying weight of ladders by up to 90%. The dolly is compatible with nearly any ladder on the market, and attaches to and secures its load quickly and easily.
NETTING
Residential netting is a great option if insufficient clearance exists for traditional fall protection. Debris netting protects materials and equipment from falling off your work surface.

**Residential Netting**
- Fall Arrest rated Residential Netting is a perfect solution when the use of traditional Fall protection is infeasible.

**Debris Netting**
- Vertical debris netting guards against debris or tools from falling over an unprotected edge.

**Pro-Knit Netting**
- Designed with an even smaller mesh size for more protection against small materials falling over the edge.

Did you know?

Debris netting can double as your job site’s Fall Prevention!
Our *Debris Netting* is designed and manufactured with a specialized double-strand configuration, as well as ultraviolet protective coating, which makes for a supremely durable and long-lasting product. Custom sizes also available.

**DEBRIS NETTING**

MADE WITH ULTRAVIOLET PROTECTIVE COATING.

- **4’ x 150’ ORANGE NETTING** 70001
- **4’ x 150’ BLUE NETTING** 70002
- **5.5’ x 150’ ORANGE NETTING** 70005
- **5.5’ x 150’ BLUE NETTING** 70023

**PRO-KNIT DEBRIS NETTING**

MADE WITH ULTRAVIOLET PROTECTIVE COATING. TIGHTER KNIT THAN REGULAR DEBRIS NETTING.

- **5.5’ x 150’ PRO-KNIT BLACK NETTING** 70008
- **8.5’ x 150’ PRO-KNIT BLACK NETTING** 70009
- **15’ x 150’ PRO-KNIT BLACK NETTING** 70010

**NETTING PLATE** 5’ MAX SPACING 70014

**NETTING CLIP** 2’ MAX SPACING 70015
The *Residential Safety Netting* is a four-inch square mesh netting ideal for Fall Arrest applications. This netting incorporates a balanced, knitted construction, with filaments running continuously throughout the netting to enhance strength and durability. It is composed of HTPP fiber, which is highly resistant to abrasion, moisture, and chemicals, and is also incredibly lightweight.

**Residential Web Strap -36"**

61200
**Outrigger & Skylight Netting**

**Horizontal Netting** is a combination of Fall Arrest and debris netting that extends horizontally away from a building façade to catch falling objects and prevent them from reaching the ground or next lower level. Due to the highly specialized nature of netting installations, Guardian is pleased to offer **Horizontal Debris Netting** on a custom-order basis only. Please contact your sales representative for more information and current pricing.

---

**MOBI Skylight Protection System**
Made of polyester & galvanized steel, reusable protection.

- **6’ 7” x 6’ 7” Netting**
  - 70024
- **9’ 10” x 9’ 10” Netting**
  - 70025

The **MOBI Skylight Protection System** is designed to prevent falls through skylights to lower levels. Once installed, it can also be used as an anchor point (per OSHA 1926) for Fall Arrest or Fall Restraint by attaching a compatible lanyard or SRL to the MOBI ratchet strap.
A key component of fall protection is ensuring the prompt rescue of a fallen worker. Sometimes this rescue needs to take place in a difficult to access area, making confined space and rescue equipment an important component of any job.

**COMMON CONFINED SPACE APPLICATIONS**

- Manholes
- Crawl spaces
- Tanks
- Pits
- Sewer systems
- Boilers
- Silos
- Chillers

Many jobs require workers to access narrow or confined spaces. Guardian has all the necessary equipment to keep you safe from falls when performing these tasks.

**REMEMBER! OSHA REQUIRES A FALL PROTECTION PLAN**

15 MINUTES

Your fall protection plan must account for the ‘prompt’ rescue of a fallen worker. Workers can suffer from negative effects of suspension trauma intolerance in as little as 15 minutes.

**WHAT IS SUSPENSION TRAUMA?**

Symptoms include: faintness, nausea, breathlessness, dizziness, sweating, paleness, unusually low or high heart rate, hot flashes, unusually low blood pressure, loss of vision.
The **Arc-O-Pod** is a high quality Rescue and Retrieval system. It is a 90” tall aluminum tripod that is lightweight, portable, and easily set up by just one worker. Its legs can be adjusted in 2” increments to best fit your work area. The Arc-O-Pod can fit a maximum 5½’ diameter hole, and is specially designed to eliminate risk of slippage or movement. It also includes a storage bag for easy transportation between jobsites.
The Rapid Deployment Rescue Ladder is specially designed to facilitate the rescue of fallen workers at significant heights, and is thus particularly applicable to the wind energy industry. This durable ladder system is manufactured with unique rung standoffs to make footholds easier and self-rescue more likely. It is also capable of supporting up to two workers at once (maximum 310 lbs. each, including all equipment), thereby allowing a rescuer to climb down to assist a fallen worker. The Rapid Deployment Rescue Ladder can be deployed within seconds, and is one of the most stable and functional rescue ladders available.
The Rescue Ladder Kit facilitates prompt rescue of a fallen worker. Easily installed and deployed in only a few moments, this 18’ self-rescue ladder is dropped down to the conscious victim. A highly visible, convenient, and weather resistant carrying bag is integrated to the ladder to allow it to be located close to the fall hazard regardless of conditions, thereby making response time faster. Fall protection plans require more than simply contacting emergency services and waiting for help to arrive. The Rescue Ladder Kit is an ideal option for ensuring workers are recovered as quickly as possible. Please note that this kit only supports one worker at a time.
As is the case with all rescues, a prompt recovery of the fallen worker is essential. **Gotcha Rescue Kits** work effectively with either conscious or unconscious victims, allow a single rescuer to carry out the rescue from a point of safety, and provide the option of either lowering the fallen worker to the next lowest level, or raising them back up to the nearest point of safety. To perform a rescue, the rescuer must have specific rescue training; consider the series of training classes offered by F.I.R.S.T. Choice Training, a division of Guardian Fall Protection, if additional training is needed.

### Gotcha Rescue Kit

**Rescue Kit for Simple Use & Rescue at Heights.** Includes Free Universal Cross Over Harness (Part # NPH-30)

<tbody>
<tr>
<td>GOTCHA CRD KIT (325’ ROPE)</td>
<td>53033</td>
</tr>
</tbody>
</table>

The Gotcha CRD Rescue Kit is a constant rate descent device suitable for both rescue and evacuation. It allows for a rescuer to raise or lower the fall victim to the nearest point of safety, or for a single user to descend to safety at a rate controlled by the equipment. No assembly is required by the user.

Rescuers must have specific rescue training; consider training classes offered by F.I.R.S.T. Choice Training, a division of Guardian Fall Protection. Guardianfall.com/Training

Gotcha CRD Kit
Part # 53033
Gotcha rescue Kits

Gotcha fire & rescue Kit is capable of lowering or raising a single person.

Gotcha shark rescue Kit
suitable for rescue. rated for 660 lbs. in normal use.

Gotcha crd Kit (195’ rope)

Gotcha shark Kit (215’ rope)

Gotcha crd Kit (325’ rope)

Gotcha shark Kit (325’ rope)

Gotcha Shark Kit
Part # 53037

Gotcha Shark Kit
Part # 53036

Gotcha Fire & Rescue Kit
Part # 15021

The Shark Rescue Kit is an assisted rescue device that enables a rescuer to cut free a fall victim from their lanyard and lower them to safety. This kit is ready to use and features a blade-free, garrote style cutter, eliminating the need for knives.

The Fire and Rescue Kit is designed for professionals in the fire and rescue industry. It allows victims to be recovered without the need to cut them free due to its unique raising and lowering functionality, and can be used in numerous applications in combination with a second kit.
The **Grabba** is an optional add-on to the Gotcha Kit. It enables the rescue of persons suspended from retractable Fall Arrest devices while using rope or wire. The Gotcha Kit should be attached to the Grabba. The Grabba is then mounted on the rope or wire that the victim is suspended from. The Gotcha Kit is then extended so the Grabba slides down the rope or wire to the victim. When it reaches the victim the device locks onto the dorsal D-ring. When pulled upwards the Grabba grabs the wire or rope and a normal Gotcha Kit rescue can now be performed, raising or lowering the casualty to a point of safety.

The **Gotcha Suspension Loop** is an accessory for any rescue system that can help alleviate the effects of prolonged fall suspension. A supremely compact and lightweight device, the Gotcha Suspension Loop allows a fallen worker to stand up in their harness to relieve pressure from their limbs. The Gotcha Suspension Loop can make the difference between walking away from a fall and being carried away from a fall. It is important to note that this equipment will not be usable by an unconscious victim, and should only be considered as an intermediate measure for use until the victim is rescued.
The **Checkmate Rescue Kit** is a kit that is used for rescue from vertical situations on high structures where constant rate lowering and minimal user input is required.

**CHECKMATE RESCUE KIT**

**SUITABLE FOR RESCUE.**

150 SERIES - RATED FOR 330 LBS. IN NORMAL USE.

300 SERIES - RATED FOR 660 LBS. IN NORMAL USE.

53039
JOBSITE EQUIPMENT
While the majority of Guardian’s products are designed to keep you safe from falling, Guardian’s Qualcraft and Trojan Tools product lines offer a variety of tools and equipment designed to make your life easier and get the job done faster.
The **ALL PRO Pole** is the industry-standard aluminum scaffolding pole that can be customized to create a scaffold system up to 48’ in height. **ALL PRO poles** are safe, strong, and durable, and their quick set up and tear down makes them ideal for the residential contractor.

- 0.140” thick aluminum walls with rib reinforcement
- Metal reinforced rubber surface eliminates distortion
- Spring-loaded pins combine with pole connector to add height up to 48’
From pump jacks to poles, workbench systems to anchors and braces, the superior functionality and design of the **ULTRA-Jack** provides professionals with an easy to operate, easy to transport, durable, safe, and reliable aluminum scaffolding system.

**ULTRA-JACK**

**WORKS WITH ALL PRO POLES**

- Spring-loaded cam lock for smooth operation and durability
- Toe straps accommodate large work boots
- Padded hand crank and brake lever for added comfort
- Highest climbing rate per stroke

**ALL PRO BRACE**

**USED TO SECURE POLES TO THE WORK WALL, AND PROVIDES THE RIGID, TRIANGULAR BRACING AS REQUIRED BY OSHA TO ENSURE A SAFE JOBSITE.**

**2002**

**ALL PRO WORK BENCH**

**IS USED TO TRANSPORT TOOLS AND SUPPLIES UP THE SCAFFOLDING SYSTEM WITH EASE.**

**2004**

**ALL PRO POLE ANCHOR**

**A SPIKED ANCHOR THAT OFFERS ADDITIONAL SAFETY AND SECURITY ON SOFT OR UNEVEN SURFACES. WORKS WITH ULTRA OR ALL PRO POLES.**

**2008**

**ALL PRO POLE BASE**

**INCLUDED WITH ALL 24' ULTRA AND ALL PRO POLES, EASILY ATTACHABLE WITH NON-SKID BASE WORKS WELL FOR FLAT AND HARD SURFACES.**

**2009**

**ALL PRO 6' CONNECTOR**

**6' CONNECTOR CAN JOIN ANY TWO POLE LENGTHS, WITH 3' OF OVERLAP IN EACH SECTION. WORKS WITH ULTRA OR ALL PRO BRAND POLES.**

**2013**

**ALL PRO NET**

**DESIGNED TO CATCH TOOLS AND DEBRIS. MADE OF HIGH DENSITY POLYETHYLENE, AND MEASURES 21' WIDE BY 4' HIGH.**

**3000**
The **Pump Jack** is designed for use with fabricated wood poles constructed of spliced 2” X 4” boards (up to 30’ high) and accommodates two 2” X 10” wood planks with toeboards attached. Foot action does all the work needed to raise to position, and a hand crank is used to lower back to the ground once work is complete. The positive double-lock system brake ensures safety by securing itself to wood poles.

The **Pump Jack Brace** is designed to secure fabricated wood poles to buildings by providing the rigid steel triangular bracing as required by OSHA.

The **Workbench / Guardrail Holder** is designed for wood staging, and is used in combination with the Pump Jack System. This allows tools and materials to travel alongside the work platform with ease.
Designed to meet the needs of the most demanding jobsite requirements, **Aluminum Staging Planks**
are available with industry recognized, V-style grip handles, and with a unique joinable end configuration.

**PUMP JACK POLE ANCHOR**

Fits two 2"x4" wood poles. Provides mudsill in loose soil conditions.

**SIDE WALL STAGING BRACKETS**

Staging bracket is rated for two workers, and additional 75 lbs. per 8' section.

**SIDE WALL STAGING BRACKET GUARDRAIL**

Allows for guardrail, mid rail & toeboard.

**PUMP JACK HARDWARE KIT**

Crank handle/cotter pin - (pump jack replacement)
TWO GREAT OPTIONS TO PUMP IT UP!

ULTRA JACK

FOOT PUMP JACK includes helpful luxury features works best with all pro 1 aluminum poles but, compatible with other brands.

Features an adjustable platform creating 14 inch to 24 inch work surface.

PUMP JACK

FOOT PUMP HAND CRANK lifts you lowers you

Designed for use with 2x4 wood poles

The PUMP JACK accommodates 2 inch x 10 inch wood planks for work surface.

GUARDIAN FALL PROTECTION
SAWHORSES & WORK TABLES

The best sawhorse available on the market! Easy to assemble by just one person, the Trojan Sawhorse makes any job easier.

- Gripping teeth design requires no screws or nails
- Make a sawhorse any length you want by using any 2”X lumber

TROJAN SAWHORSE
POWDER-COATED, DURABLE STEEL, FOLDING SAWHORSE LEGS.

STANDARD SAWHORSE - 27” TALL
TS27

TALL SAWHORSE - 35” TALL
TS35
**Roller Stand**

Part #RS15

The Roller Stand is a perfect “extra hand” to have around when you need to support longer materials beyond your saw or table. With a durable, powder-coated finish, our Roller Stands will not rust or stain wood.

**Dolly Cartin’**

Allows easy transportation of MDF, Sheetrock, Doors, Windows, Counter-tops, and much more.

The Dolly Cartin’ offers quick and easy transportation for doors or other large, awkward to carry paneling. Simply position material between the Dolly Cartin’ clamp plates, secure, and move to the desired location.

**Dolly Cartin’ - Made in USA**

- Two, 10” pneumatic wheels for smooth rolling
- Powder-coated finish
- Quickly adjust from 0” - 9” wide
- Turn-on-a-dime maneuverability

**Door Holder**

Durable Powder-Coated Steel Tube.
Quick Setup, Compact Size for Easy Storage.

- Holds door panels up to 3” thick
- Great for routing and sanding
- 24” wide base, 10” vertical support
The **Quick Support Tool** provides extra support when working alone, and is designed to support drywall, ceiling panels, fixtures, etc. for proper positioning during installation. This tool supports up to 110 lbs., and is adjustable from 3¾’ - 10’. The quick support tool can also act as a cargo load stabilizer or used to construct a dust barrier.

**Quick Support Tool - 12’**
- Supports: 88 lbs. load
- Length: 53”-144”

**Quick Support Tool - 10’**
- Supports: 110 lbs. load
- Length: 45”-120”

**Quick Support Carrying Bag**
- Specifically designed for transporting supports and accessories. Holds up to 8 supports.

**Quick Support Adaptor with Ball Joint**

**Quick Support Replacement Pad**

**Peel & Stick Zipper (2 Pack)**
- Simply apply to clean tarp surface, open zipper & cut the tarp the length of zipper.
The **Wall Jack** is used to raise walls, as well as tighten flooring and decking. Made of heavy-duty cast iron, the Wall Jack rides up and down on a 2”x4” board, working just like a car jack. To lift walls, insert a length of ¾” pipe (not included) to act as a lever. The Wall Jack has a capacity of 1,000 lbs. with the use of a 2”x4” board.

**Wall Jack**  
Made of cast iron. 1000 lbs. capacity per jack. Works with 2” X 4” pole & 1” OD steel pipe.  
Part # 2601

**Wind Hook Accessory Kit**  
Includes baseplate and wind hook cable. Completes wall lifting system. Use with 2601.  
Part # 2602

**Little Pee Vee**  
Helps easily move sill plate on construction walls and assure proper alignment.  
Part # 2605

**Big Pee Vee**  
Helps easily move sill plate on construction walls and assure proper alignment.  
Part # 2610

**Adjustable Wall Brace**  
Made of powder-coated steel. Adjusts from 10½” to 11½” with fast thread design. Helps easily brace and align walls.  
Part # 2620

**Magnetic Sweeper**  
Sweeper picks up ferrous metal such as tools, bolts, and nails. One pull quick debris release. Handle extends from 30” - 44½”.  
Part # 2688
The Adjustable Roof Bracket attaches to the Pump Jack system to offer a sturdy, flat surface to stand on while roofing or working at heights. The Adjustable Roof Bracket is designed to be used with 2” X 6” or 2” X 10” planks, and allows for easy installation and removal without damaging shingles.

ADJUSTABLE ROOF BRACKET
MADE OF 12-GAUGE STEEL. 10” ADJUSTABLE PLATFORM.
THREE POSITION PLATFORM: 30°, 45°, OR 60°.

The PRO-LINE Adjustable Steel Roof Bracket offers a sturdy, flat surface to stand on while roofing or working at heights. The 10” platform adjusts to four different angles, and its rounded corners eliminate shingle damage.

PRO-LINE ADJUSTABLE ROOF BRACKET
MADE OF 11-GAUGE STEEL. 10” ADJUSTABLE PLATFORM.
FOUR POSITION PLATFORM: 30°, 45°, 60°, OR 90°.

The Adjustable Wood/Steel Roof Bracket is made of heavy-duty wood and 15 gauge galvanized steel. It is designed to hold a 12” platform, is adjustable to two positions, and can be easily installed and removed without damaging shingles.

ADJUSTABLE WOOD / STEEL BRACKET
MADE OF 15-GAUGE STEEL. 12” ADJUSTABLE PLATFORM.
TWO POSITION PLATFORM: 45° OR 60°.

The Slater Style Roof Bracket features six position locking adjustments, and is constructed of heavy-duty galvanized steel.

SLATER STYLE ROOF BRACKET
MADE OF HEAVY-DUTY STEEL. 10” ADJUSTABLE PLATFORM.
THREE POSITION TONGUE. 6 POSITION LOCKING ADJUSTMENT.

NAILING PLATE
FOR USE WITH SLATER STYLE BRACKET PART # 2525
**FIXED ROOF BRACKETS**

The **Fixed Roof Bracket** is durable, easy-to-install and remove, and is designed to protect all roof surfaces. Maximum 8' of spacing between brackets.

### HEAVY-DUTY FIXED ROOF BRACKET

**Made with powder-coated steel.**

If you’ve ever felt like pen and paper documentation is time consuming and error-prone, Guardian’s **G-Track Radio Frequency Identifier (RFID)** is for you.

G-Track RFID technology makes inspections, regular maintenance, and inventory a breeze. And, upon your request, Guardian supplies G-Track RFID Tags free of charge as an accessory for all of our products.

G-Track RFID Tags are available in adhesive, screw-on, or split ring models that readily attach to any Guardian product.

Our G-Track RFID Tags are compatible with Havoc SUPERTRACK CT equipment and safety management software.

**For more information on Havoc and SUPERTRACK CT, visit:**
www.havocllc.com/rfid/software/

ESG is a division of Guardian Fall Protection that specializes in providing customized solutions and project engineering for clients through the design and implementation of complete fall protection and facade maintenance systems.

WHAT WE DO

- Design & Engineering
- System Install
- Testing & Certification
- Fall Hazard Analysis
Get the **ANSWERS** to all of your **questions** about Fall Protection, Rescue, and Confined Space!

The **FIRST Choice Training** Catalog is now available!
ONLINE COMPETENT PERSON TRAINING

NOW AVAILABLE

ONLINE COMPETENT PERSON TRAINING

This online fall protection course from Guardian Fall Protection will help prepare you to take on the role of the jobsite Competent Person. In this eight-hour course, everything ranging from product knowledge, inspection, planning, and more are addressed through the use of presentations, videos, and knowledge checks.

Guardian Fall Protection (henceforth referred to as GFP) expressly warrants to the purchaser that all GFP products are free from defect in material and workmanship at the time of shipment. This warranty only covers defects in material and workmanship (those resulting from product design and/or manufacture); it does not cover conditions resulting from normal wear and tear, neglect, abuse, or accident. GFP’s obligation under this warranty applies for the lifetime of the product, and is limited to the replacement of product only. This warranty is not transferable to any other GFP service, and does not apply to product that is resold after having been put into service. No other person or firm is authorized to assume or assign for GFP any other liability in connection with the sale or use of GFP products. Furthermore, this warranty is void if any product is changed or altered in any way, or if the product is used in a manner other than for which it is intended. All returns to GFP must have a return authorization that is obtained from the GFP Customer Service department. All returns must be shipped prepaid. Contact the Customer Service Department at 1-800-466-6385.
At Guardian, our number one priority is keeping you safe. We promise that, if you fall using our equipment, we will replace the equipment involved in the fall free of charge.

Should you experience a fall, immediately remove the affected product(s) from service and contact our customer support team at 1-800-466-6385. They will help you coordinate return of the damaged product and the shipment of your replacement.
OUR VISION

TO ALWAYS BE THE MARKET’S FIRST CHOICE FOR FALL PROTECTION AND SAFETY PRODUCTS

OUR MISSION

TO PROVIDE INNOVATIVE SOLUTIONS AND EDUCATE THE COMMUNITY TO PROTECT THE WORKFORCE AND SAVE LIVES
